

Uniquely Ruthless

The Espionage Metagame of EVE Online

The Mittani

A Brief Introduction

- What is a Metagame?
- Purpose of Talk:
 - Description of the hidden aspects of EVE gameplay
 - Analyze EVE's metagame for application in other environments
 - Convince attending devs to create more games with vibrant espionage gameplay

SOLODRAKBANSOLODRAKBANSO [LODRA]

**OUR ENEMY SURRENDERS TO US
BECAUSE THEIR ALLIANCE LEADER QUIT
AFTER THEIR MEMBERS REFUSED TO FIGHT
SINCE THEY DON'T FEEL SAFE IN THE FIELD
BECAUSE OF AN EMBARRASSING LOSS
WHEN OUR SUPPORT FLEET ATTACKED
WHILE THEIR MAIN FLEET HESITATED
DUE TO BAD RECONNAISSANCE
AFTER THEIR SCOUT WAS KILLED
BECAUSE HE COULDN'T RUN AWAY
SINCE YOU HAD HIM TACKLED.**

EVERY SHIP COUNTS

**BE PART OF SOMETHING BIG, EVEN IF YOU'RE SMALL.
JOIN GOONSWARM TODAY!**

BEFORE

**THE ALLIANCE WAS LOST
BECAUSE THE STATIONS WERE TAKEN
BECAUSE THE TCUS WENT VULNERABLE
BECAUSE SOV DROPPED EVERYWHERE
BECAUSE THE SOV BILL WASN'T PAID
BECAUSE THERE WAS NO MONEY IN THE WALLET
BECAUSE NIART EPAR DIDN'T DO HIS JOB
BECAUSE HE'S A RETARDED GIMMICK**

GOONSWARM 2010

**EVEN THE BIGGEST SHIP
CAN'T MAKE A DIFFERENCE**

AFTER

Overview

- History of Espionage in Multiplayer Games
- Pros and Cons of an Espionage Metagame
- Three Key Attributes of an Espionage Metagame
- Four Types of Espionage Gameplay

The Birth of Espionage in MMOs

- The Dark Ages:
 - Lootable PK MUDs - DartMUD
 - Camera Code/Breeze Code on MUSHs
- Early PvP MMOs:

Ultima Online

Everquest

Shadowbane

Modern MMOs Featuring Espionage

EVE Online

Global
Agenda

Darkfall

Benefits of an Espionage Metagame

- Free Media Coverage, a dramatic Recruiting Tool
- Players can use cunning as an in-game skill
- Espionage is the ultimate in UGC

Hazards of an Espionage Metagame

- Impact of espionage is completely unpredictable, outside of Dev control
- Offends sense of 'fair play'
- Customers dislike losing or being cheated

Three Key Attributes of an Espionage Metagame

- Player-Created Factions
- Significant Consequences and Risk of Loss
- Supportive Mechanics & Dev Environment

Factions Across Modern MMOs

FIXED FACTIONS:

PLAYER-CREATED FACTIONS:

Fixed Factions Examples

Alliance VS Horde

Order VS Destruction

Rebels VS Empire

Federation VS Klingons

Key 1: Player-Created Factions

- Espionage requires a personal commitment which is meaningless without player engagement in a conflict
- Most MMOs force players into fixed factions, limiting the level of player engagement

GoonSwarm VS Band of Brothers

Federation VS Klingons

(roleplayers) (roleplayers)

Involvement in the Factions

- The more personal the struggle, the more intense the espionage gameplay becomes

“The final days of The Great War”

Key 2: Consequences and Risk of Loss

- Espionage cannot exist in an arena where nothing is risked

"Guys guys MY DKP~!!!"

\$4000 down the drain

- Convertible Currency and RMT

Key 3: Supportive Mechanics & Dev Environment

- Must provide opportunity for espionage gameplay in the client itself
- Must have 'clean' dev environment with rigorous policing against corruption
- Laissez-Faire attitude towards fates of players

Two Additional Factors

- Shardless Environments
 - Not a requirement for espionage
 - Increases the risk of loss and player engagement
 - “Nowhere to Run, Nowhere to Hide”
- Avoid Playerbase Segregation
 - MMOs with most vibrant espionage lack a level-based system: EVE, UO, Darkfall
 - Levelling reduces the relevant population for player factions.
 - New players can contribute immediately in non-level-based games, helping factions grow.

Four Types of Espionage Gameplay

Intelligence Gathering

Sabotage

Counterintelligence

Fraud

Intelligence Gathering

- Agents gather information to remove or create an element of surprise

Success

Versus

Failure

Intelligence Gathering

- Allows 'Pure Meta' gameplay, entirely separate from game client
- Vibrant external metagame has several benefits:
 - Reduces game load
 - Increases player involvement

Intelligence Gathering

- Classic Divide: Human vs Signals Intelligence
- Player agents vs forum hackers
- Competitive Espionage in the Alliance Tournament

Sabotage

- Dramatic, Slash-and-Burn Events
- Almost inevitably exposes an agent
- Attracts the most media coverage

Theft

Stealing Corporation/Alliance Assets

Strategic Sabotage

Altering the Course of a War

Diplomatic Sabotage

Diplomatic Manipulations

Obliterating an Entire Alliance

Booya~

Counterintelligence

- Spy vs Spy
- Spyhunting vs Witch-Hunting
 - When at risk, Agents will always try to provoke a witch-hunt
 - Without technical knowledge, spyhunting is just torches and pitchforks

Counterintelligence

- Bleeding Edge of the Metagame
 - Most Secretive: techniques can be countered if exposed
 - Most Resource-Intensive: requires coders with forensics knowledge, massive time investment
 - Most frustrating: Never achieves 100% clarity

Counterintelligence

- Methods:
 - Collecting IP Addresses & Geolocation
 - Timestamps: Forums and Teamspeak
 - Signature Bugs

- Honeypots

Fraud

- Not espionage, strictly speaking
 - Uses identical skillset
 - Nationalistic vs Narcissistic Agents
- Scamming:
 - Types of Scams
 - Item Trade Scams
 - Recruitment Scams
 - “I’m Quitting EVE, Send Me Isk”

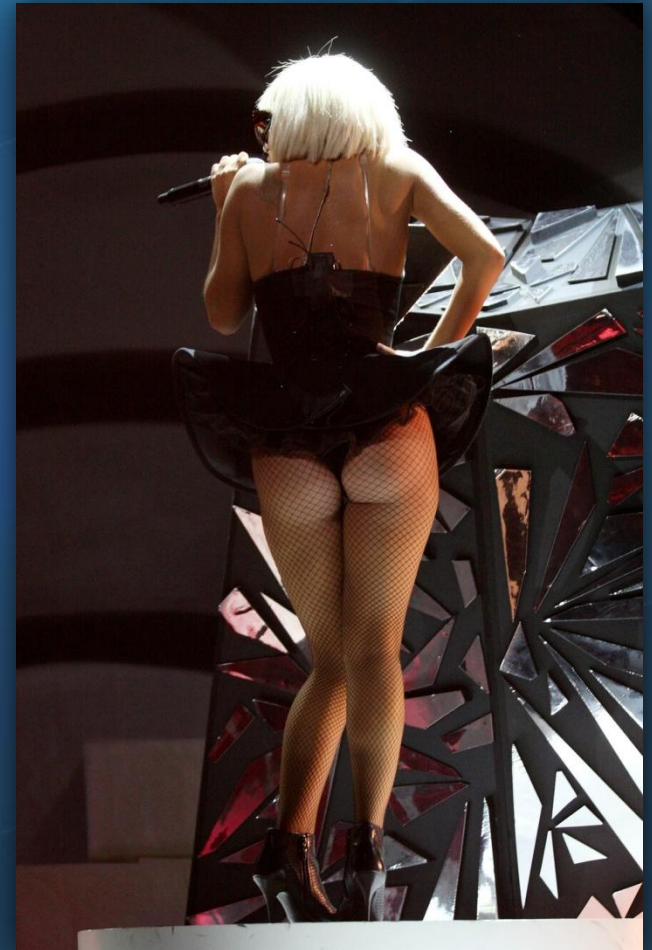

Fraud

- Financial Shenanigans
 - Ponzi Schemes
 - “Legitimate” Banks gone bad
- Fraud in EVE, both in scams and finance, closely mirrors techniques used in the real world.

Conclusion

- Make more games featuring espionage
- Formula applies to many possible settings
- FFFFFFFFFFFFFFFFFFFFFFFFFFFFFFFFFF
FFFFFFFFFFFFFFFFFFFFFFFFFFFFFFFFF
FFFFFFFFFFFFFFFFF
