“The holy grail is to spend less time making the picture than it takes people to look at it.”  
**Banksy**

What **parts** of a game can we actually design?

**AF.FOR.DAN.CE** is a quality of an object,  
or an environment, which **allows** an  
individual to perform an action

**AF.FOR.DAN.CE** is a clue to the function  
of an object

DOOR.

No. 278,066.

Patented May 22, 1883.

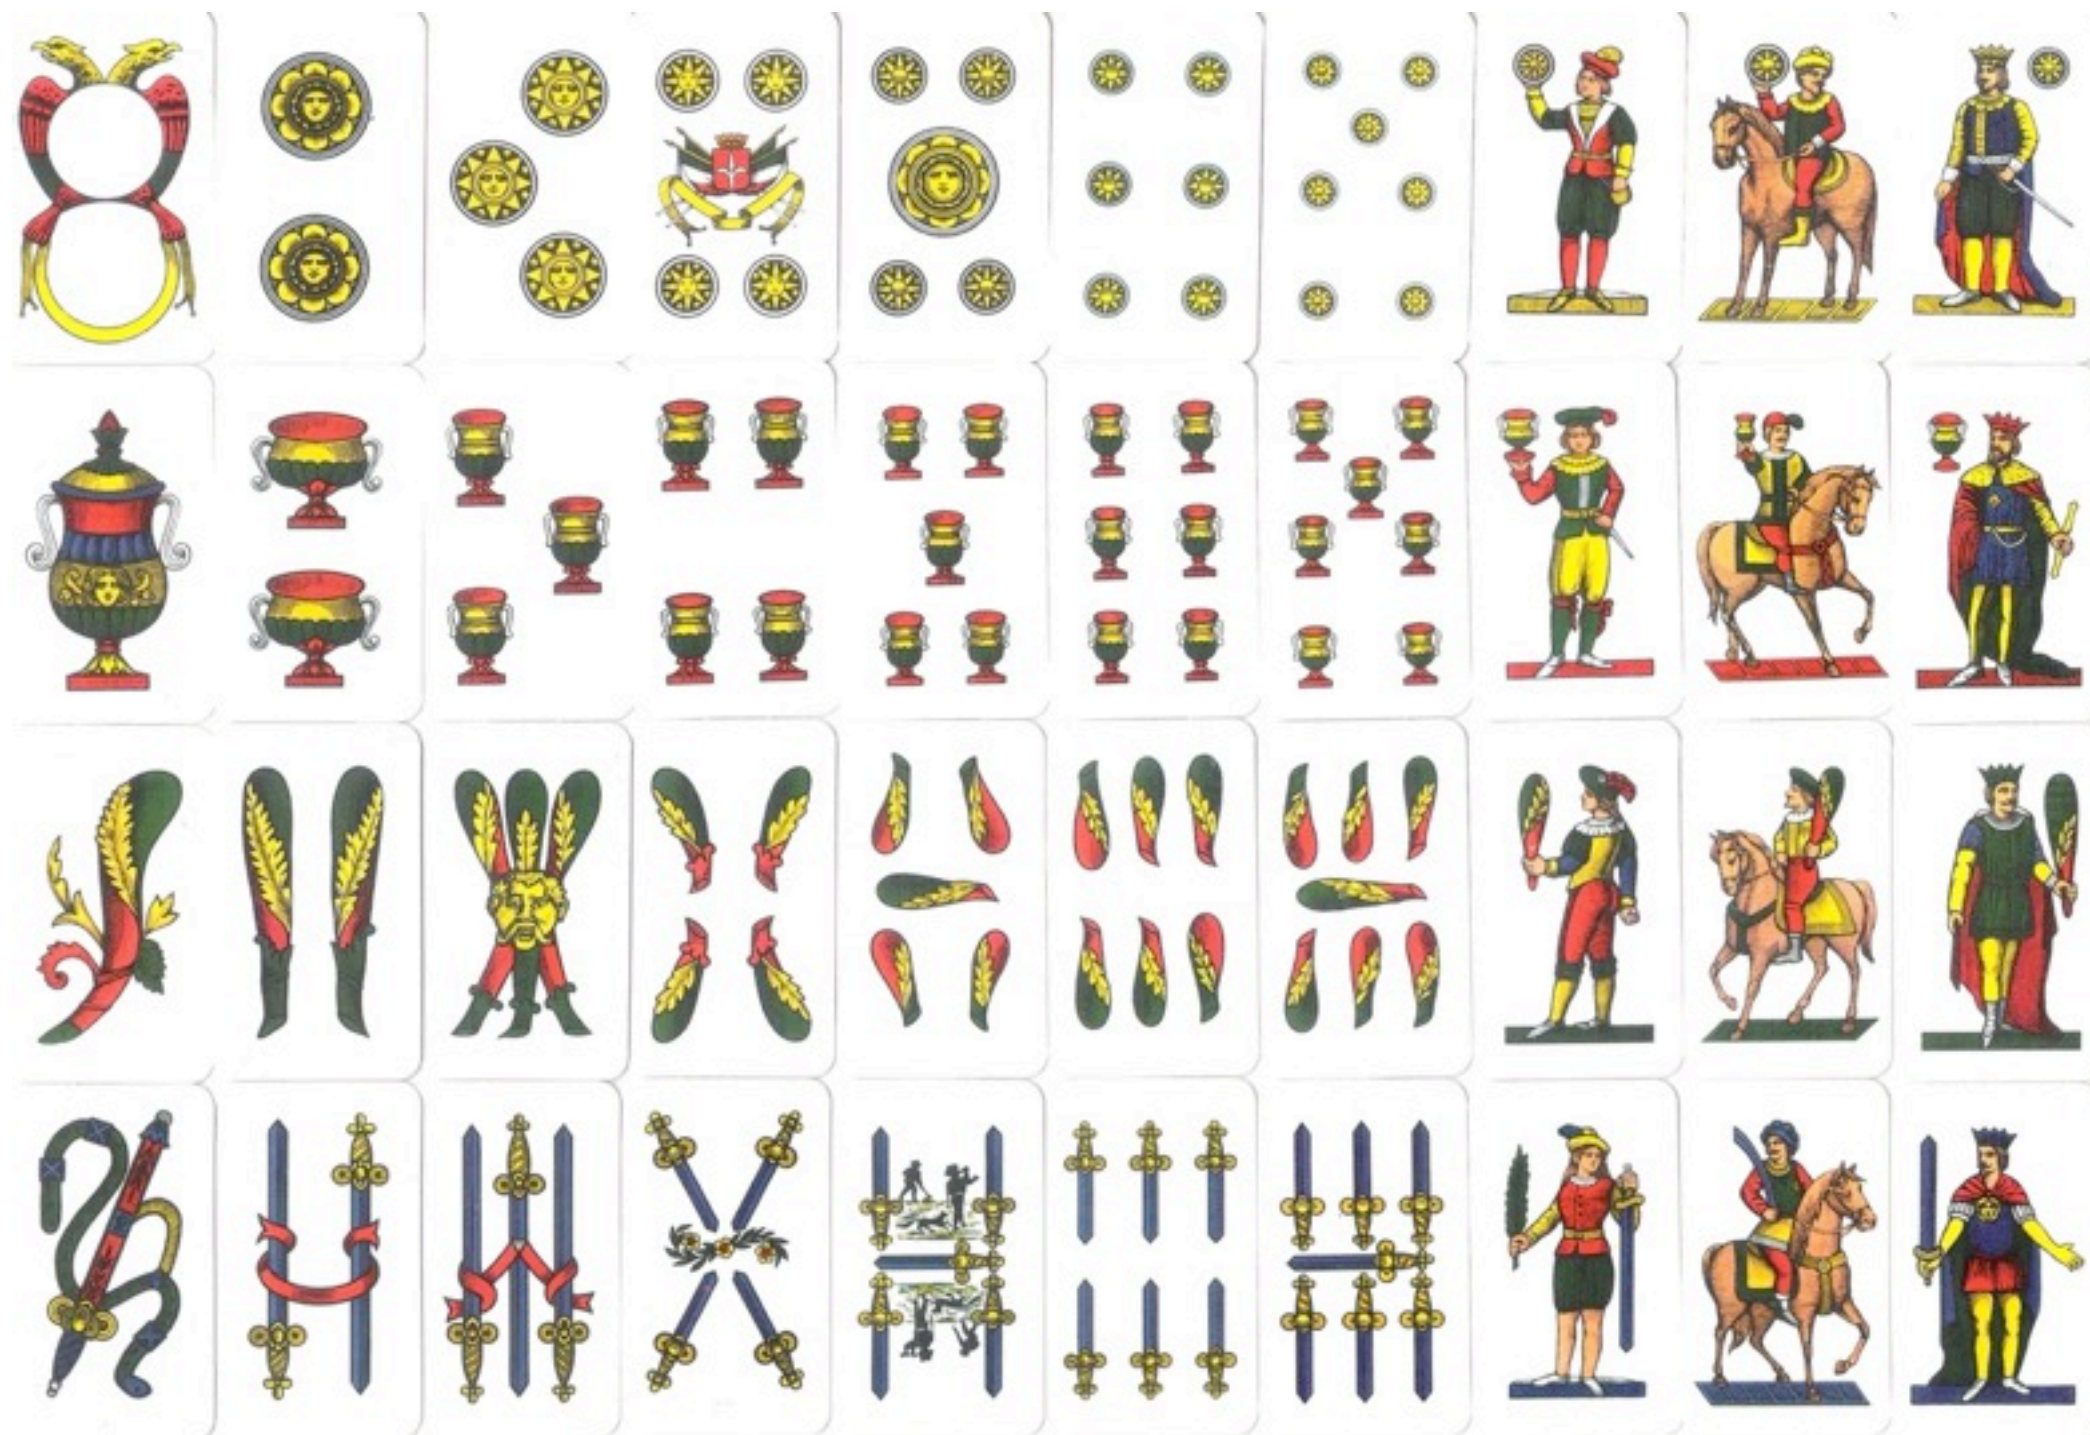

**AF.FOR.DAN.CE** is the **array** of “action  
possibilities” latent in an object  
**Gibson, 1977**

**AF.FOR.DAN.CE** is the object's quality  
through which the user is **invited** to act  
upon it in certain way

**Norman, 1988**

# Pose like a ninja

Any player whose button  
is pressed loses

- 1 Games Happen
- 2 We don't design games
- 3 We hope for games to take place

# What makes a game “broken”?

# Escape From The Aliens In Outer Space, 2010

## ESCAPE

FROM THE ALIENS  
IN OUTER SPACE

GAUZE	01	02	03	04	05	06	07	08	09	10	11	12	13
	14	15	16	17	18	19	20	21	22	23	24	25	26
	27	28	29	30	31	32	33	34	35	36	37	38	39

“Now, one **neat trick** is that the **aliens can move 1 or 2** spaces per turn, whereas the humans can only move one. So, if you’re playing as an alien **you don’t want to run around too quickly and give away the fact that you’re an alien.**”

“As a game, it’s bad. Very bad. **Broken**, unbalanced, and not at all put together.

I have a cynical hunch that without the “minimalistic” art style that fans of the game get so wet about, the game would be far less popular.

Yep, you can certainly **turn this into a fun game** with a lot of work.”

“With the wrong group of people, this is somewhere around a 2.

With the right group of people,  
it breaks the chart.

[...] **So much** is done here with **so little.**”

“The game is extremely malleable; you can home rule the hell out of it, create your own variations and scenarios, yet keep the integrity of the game intact.”

Author: E.g. "Ennio Maria Dominoni"  
 Your Email Address: optional@example.com  
 Scenario Name: My Scenario  
 Suggested # of players: E.g. "2-8"  
 Description: E.g. "Tactical game scenario in which the Aliens need to escape from the ship before the Humans arrive to the nest."

## A. GENERAL MOVEMENT CHANGES

- A.1) ☐ Players draw one Dangerous Sector Card even when moving into Secure Sectors.
- A.2) ☐ Players can stand still in a Sector, but must declare it by saying "I don't move."
- A.3) ☐ Players do not declare when they have been eliminated by an attack. They are still eliminated, and take no further actions or movements for the rest of the game (each turn they must pretend to move by writing something in their Movement Record).
- A.4) ☐ Players cannot move into Secure Sectors
- A.5) ☐ Any player that is eliminated by an attack starts over in his Starting Sector at the beginning of his next turn.
- A.6) ☐ Only Aliens can move into Secure Sectors

## B. HUMAN MOVEMENT CHANGES

- B.1) ☐ Human characters start the game in the Alien Sector.
- B.2) ☐ Humans can move up to two sectors at a time instead of only one.
- B.3) ☐ Eliminated Humans become Aliens, and continue the game from the Sector where they were eliminated.
- B.4) ☐ Human characters start the game on one or more Escape Hatch Sectors (chosen by the players). You cannot escape from the ship using the Escape Hatch Sector you begin the game in.  
E.g. "Hatch 1"
- B.5) ☐ Humans can attack, following the same rule as the Aliens. But, a human who successfully attacks another player does not increase his movement speed.
- B.6) ☐ There are no Human players.

## C. ALIEN MOVEMENT CHANGES

- C.1) ☐ Aliens can move up to three Sectors per turn, or up to four if they have eliminated at least one Human.
- C.2) ☐ Aliens increase their maximum movement per turn by one Sector for each Human they eliminate.
- C.3) ☐ Aliens do not increase their maximum movement when

- C.6) ☐ Aliens start the game on one or more Escape Hatch Sectors (chosen by the players).  
E.g. "Hatch 1"
- C.7) ☐ Aliens cannot be eliminated when attacked.
- C.8) ☐ There are no Alien players. All Humans who can escape before 39 rounds have been played win.

## D. ESCAPE HATCH CHANGES

- D.1) ☐ Escape Hatch Sectors are always open and can be used by all Humans. Do not use the Escape Hatch Cards.
- D.2) ☐ Escape Hatch Sectors are all open at the beginning of the game. Do not use the Escape Hatch Cards. But, each Escape Hatch Sector can be used by only one Human, and becomes blocked after use.
- D.3) ☐ Aliens can move onto Escape Hatch Sectors. If they do, they can permanently block that Sector by attacking it.
- D.4) ☐ Blocked Escape Hatch Sectors can be opened by using one or more Item Cards (chosen by the players). You can choose to require specific cards, or simply to discard any cards.  
E.g. "Teleport"
- D.5) ☐ Players can try to open a blocked Escape Hatch Sector by drawing an Escape Hatch Card when they move into an Escape Hatch Sector. Since players must move every round, you can only attempt this every two turns.
- D.6) ☐ All Escape Hatch Sectors are blocked at the beginning of the game. They open automatically after a number of turns have passed (chosen by the players).  
E.g. "10 Turns"
- D.7) ☐ All Escape Hatch Sectors are blocked at the beginning of the game. They are open only during specific turns (chosen by the players: e.g., only on odd-numbered turns, or turns in the 20's, etc.).  
E.g. "10-20"
- D.8) ☐ Only one or some of the Escape Hatch Sectors (chosen by the players) are open (or openable, if combined with any of the rules above).  
E.g. "Hatch 1"

## E. WINNING CONDITION CHANGES

- E.1) ☐ Only the last living Human survivor can leave the spaceship.
- E.2) ☐ The Humans only win if all the Aliens are eliminated.
- E.3) ☐ Any Player that eliminates at least a certain number of other players (chosen by the players) is a winner.  
E.g. "2 Players"
- E.4) ☐ Any Human that survives a given number of turns (chosen by the players) is a winner.

We really really like:

- unclear victory conditions
- consistent mood <3
