

Putting the teams at the heart of development

Helga Bjarnadóttir

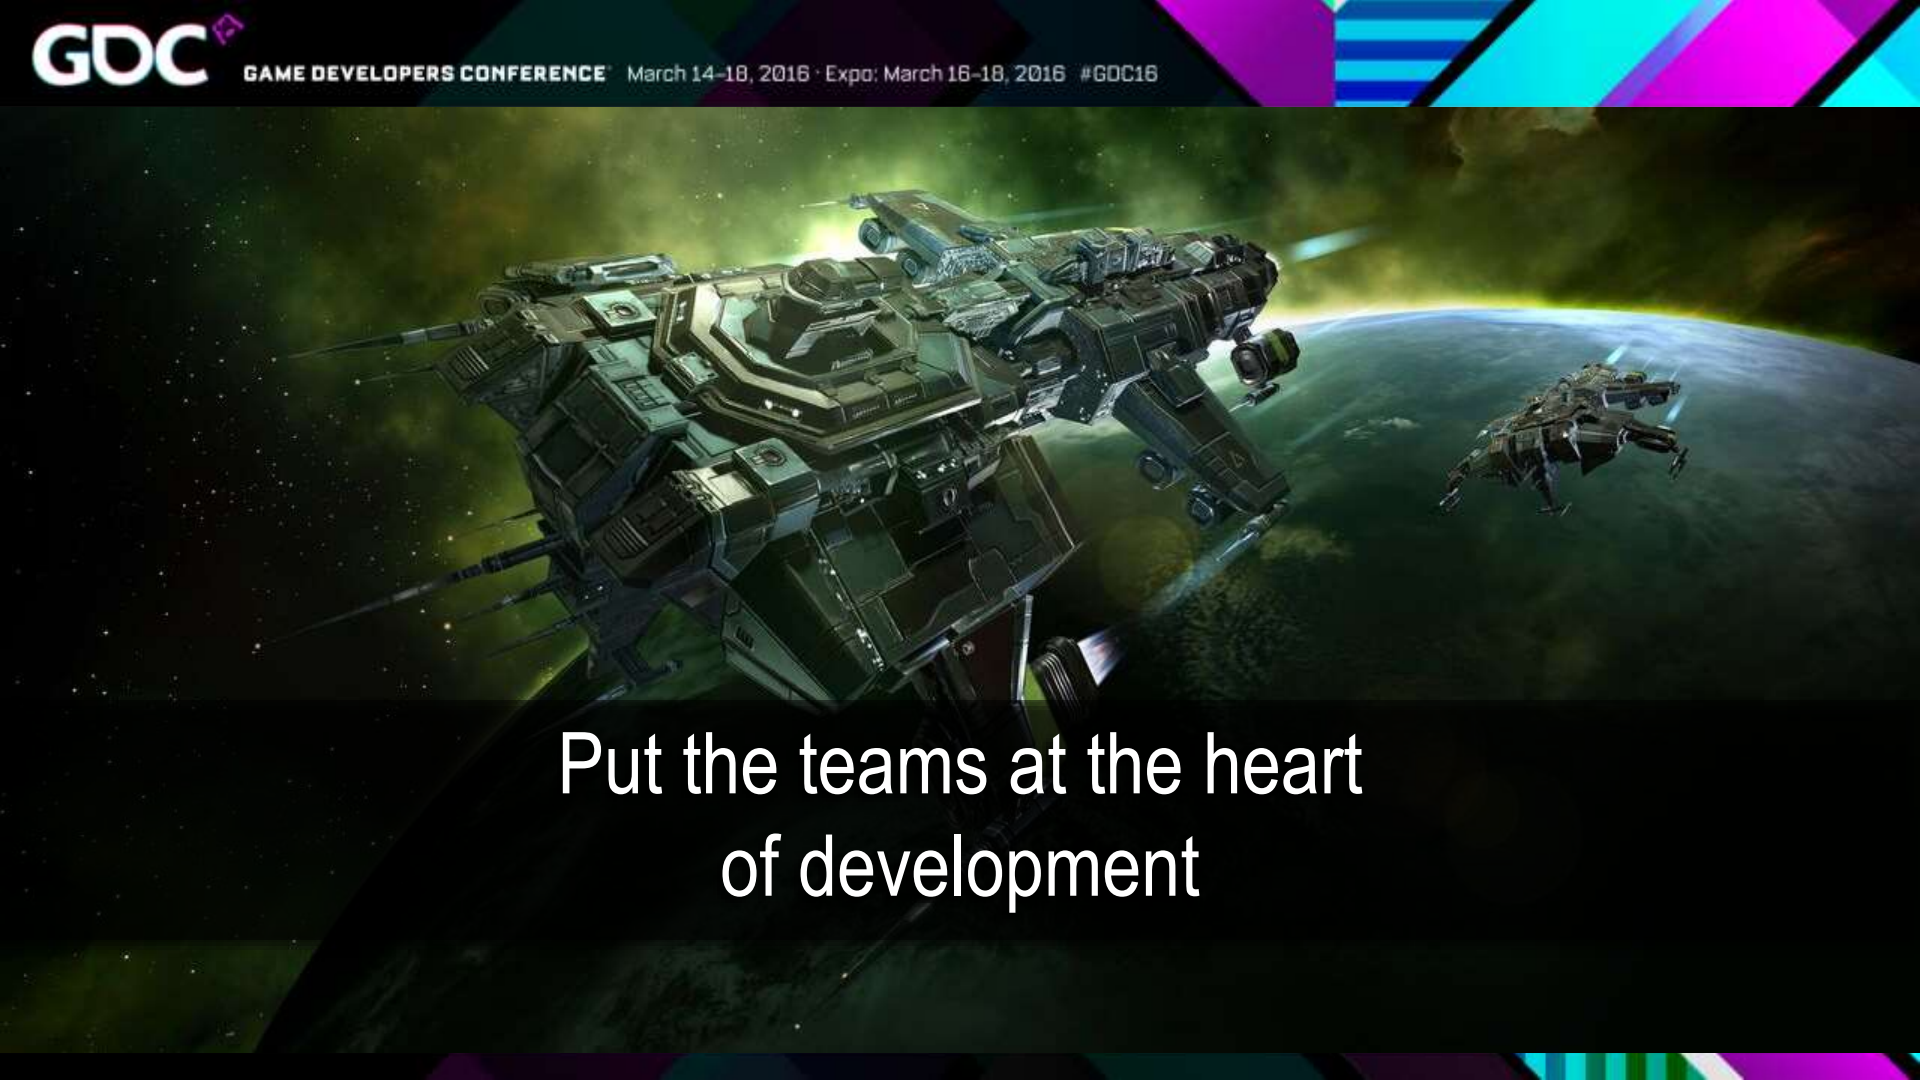

Development Manager, EVE Online
CCP Games

We got rid of Product Owners and
gave that role to the teams

Put the teams at the heart
of development

Today we have:
More frequent releases

Today we have:

More frequent releases

Removed the PO

SPRING 2016

Team Based Management

2012: Too little focus on the individual

2012: Too little focus on the individual
Directors with focus on process
Managers with focus on people

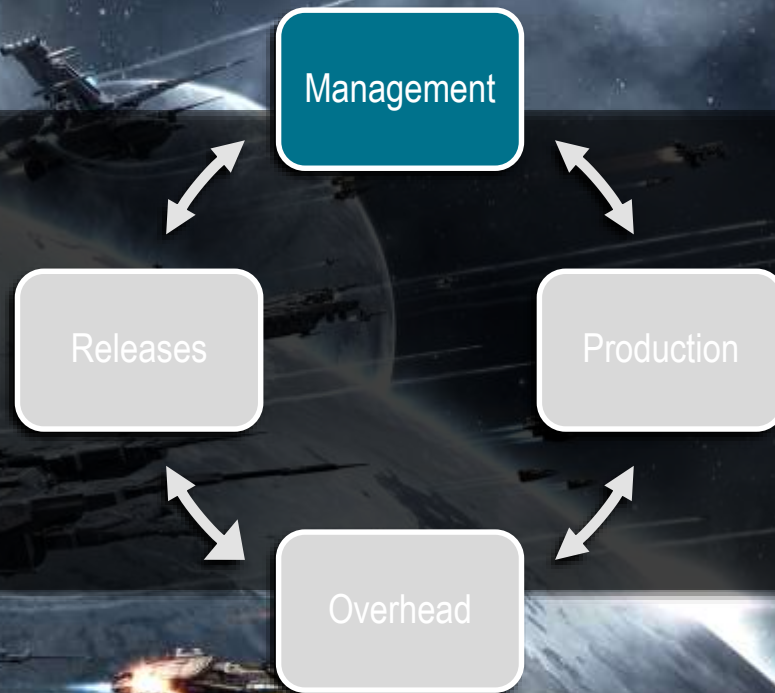

Management

Releases

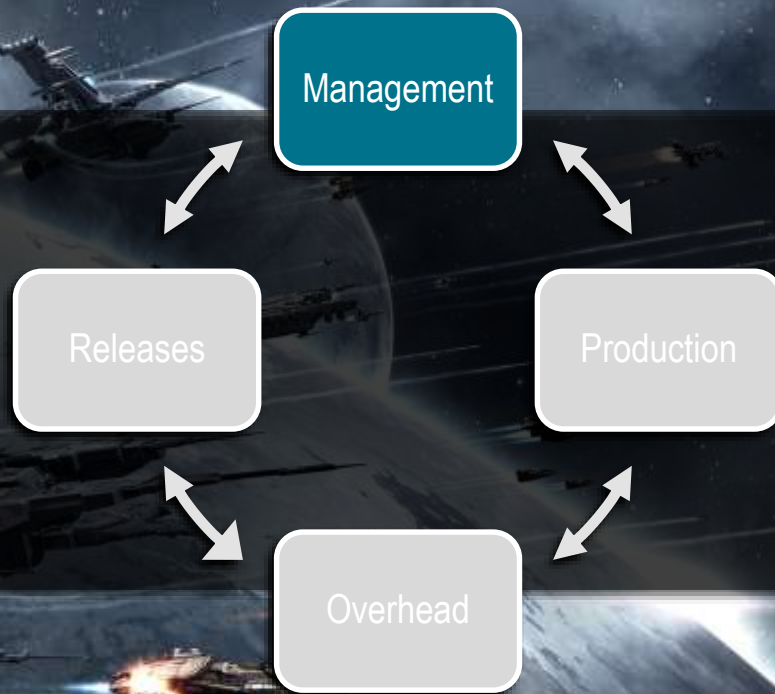

Production

Overhead

Managers Disconnected From Project

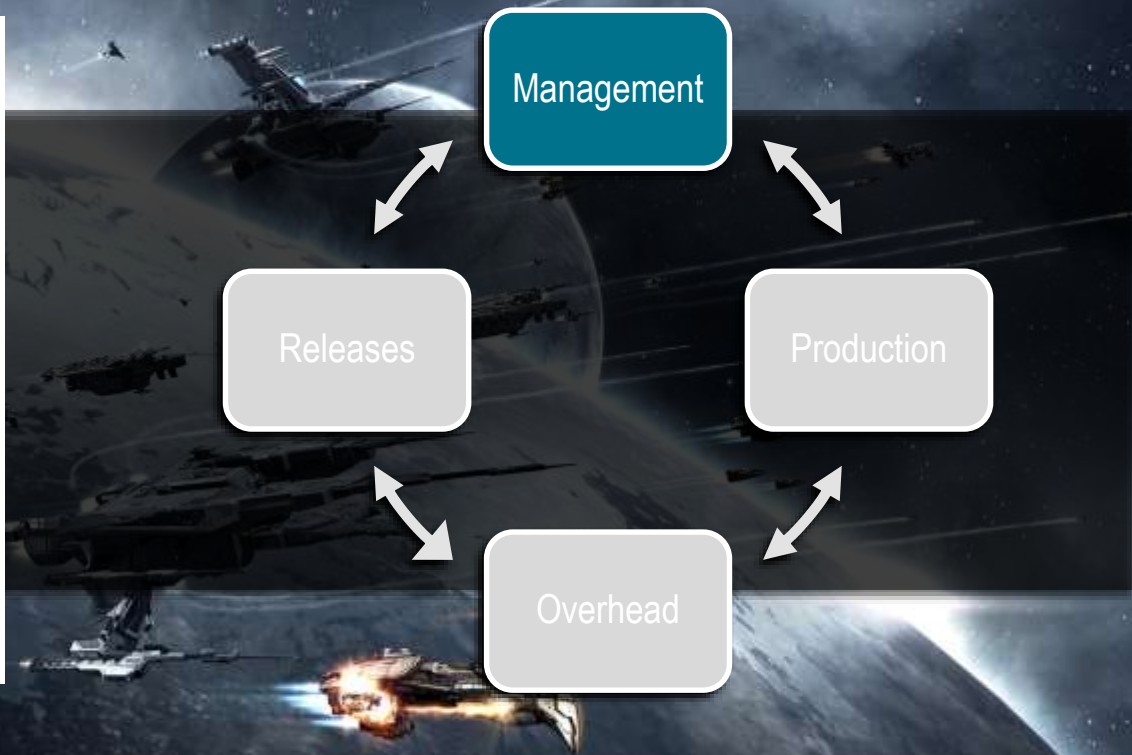

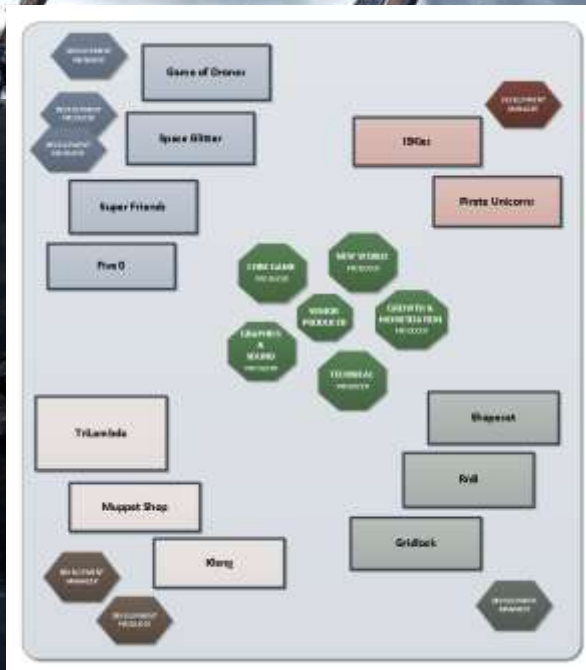

Second hand feedback
Too many teams

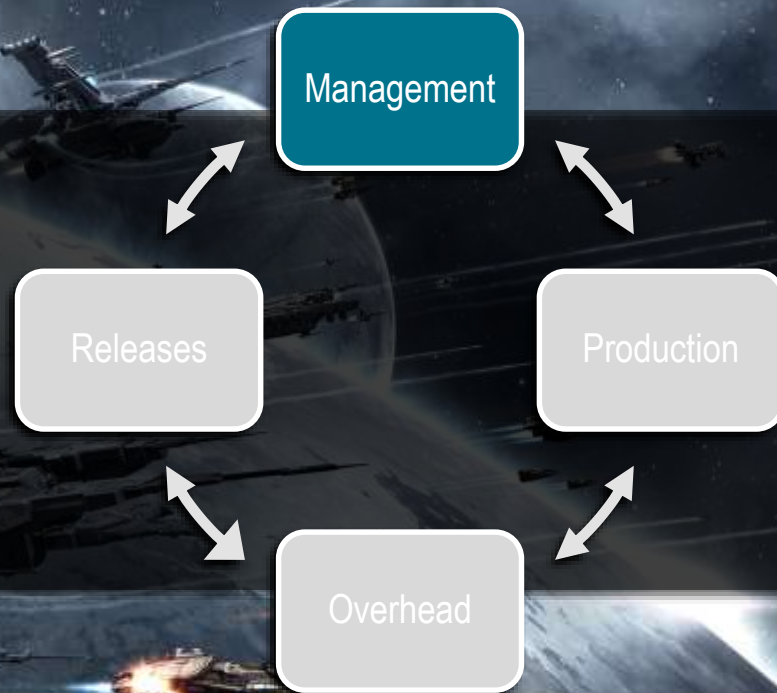

Discipline based management in cross-disciplinary teams

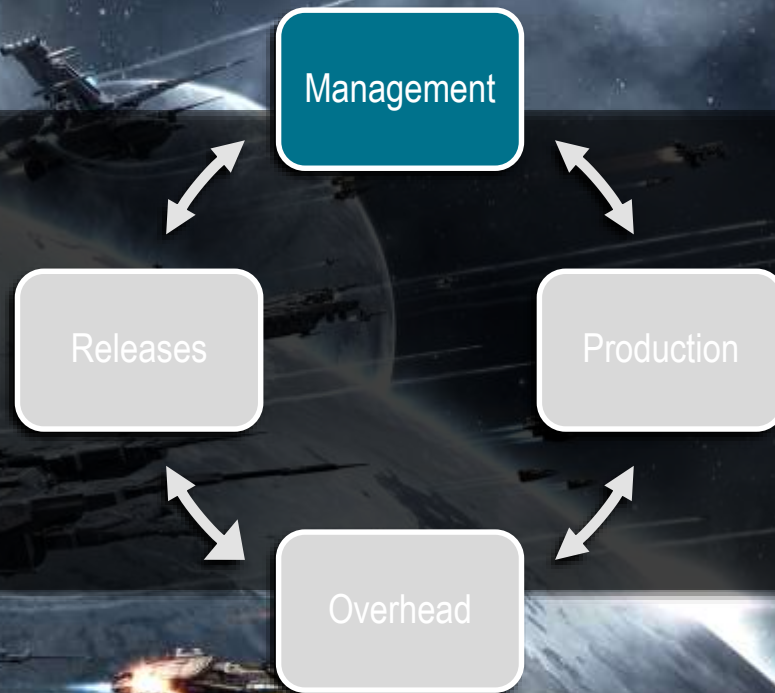

Focus on the Teams

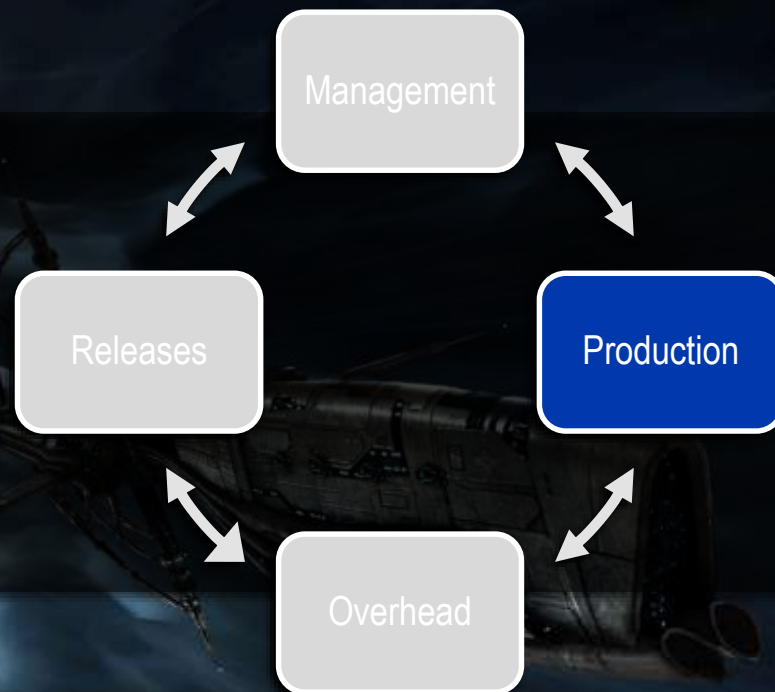

Improves problem solving

Improves problem solving
Managers and directors work
closely together

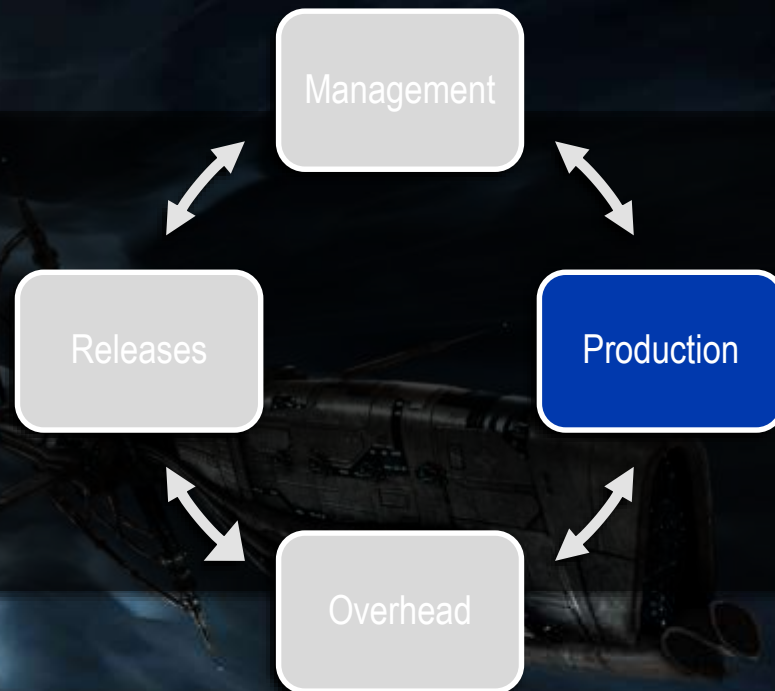

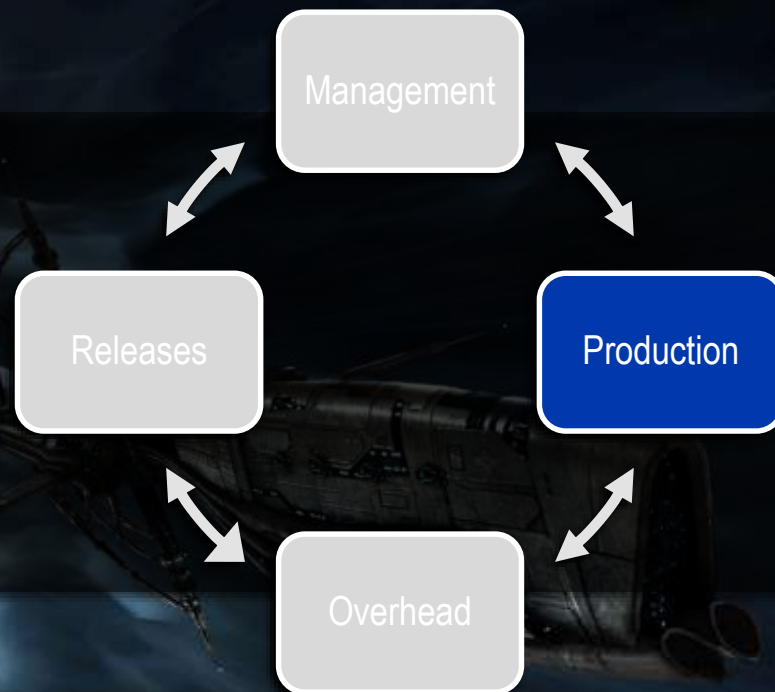

Removing The Product Owner

Split focus

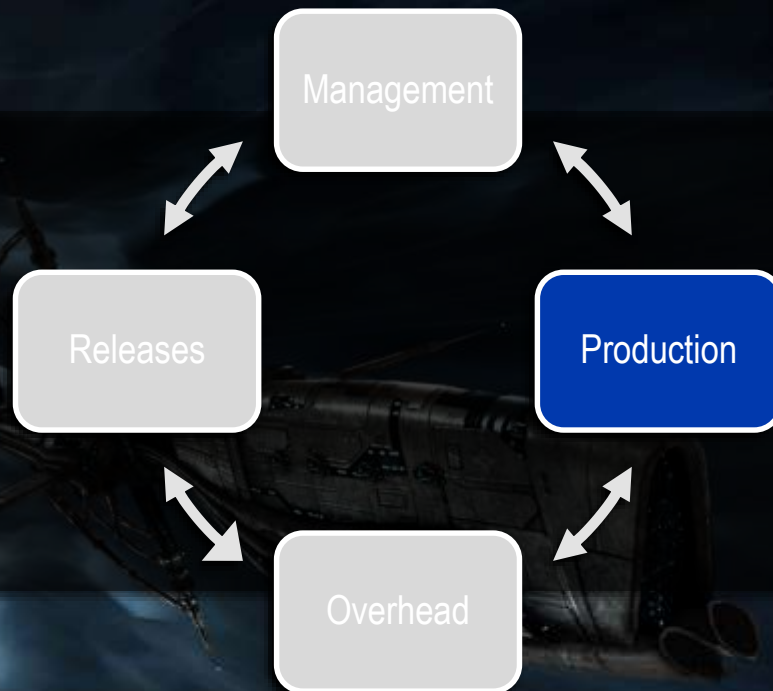

Limited knowledge
of the product

Lack of team
ownership

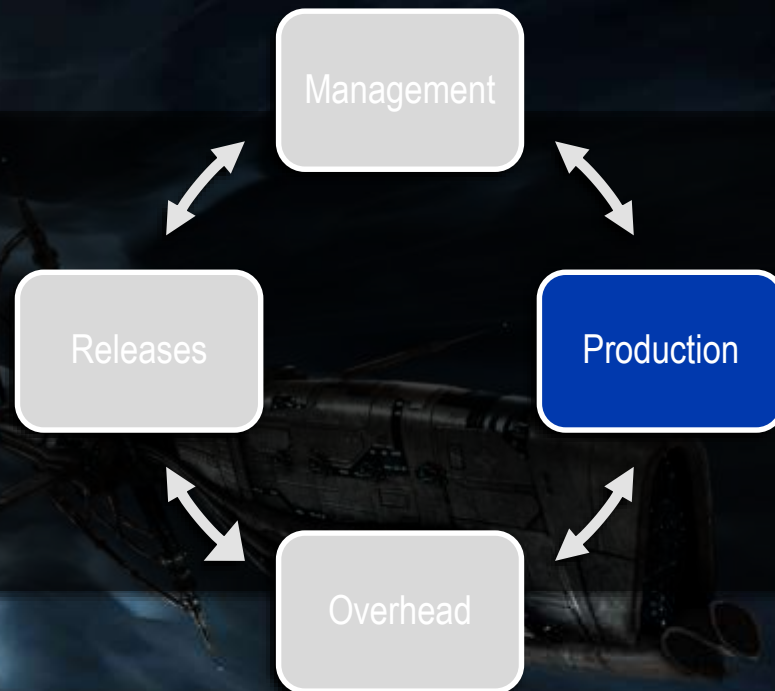

Less team
empowerment

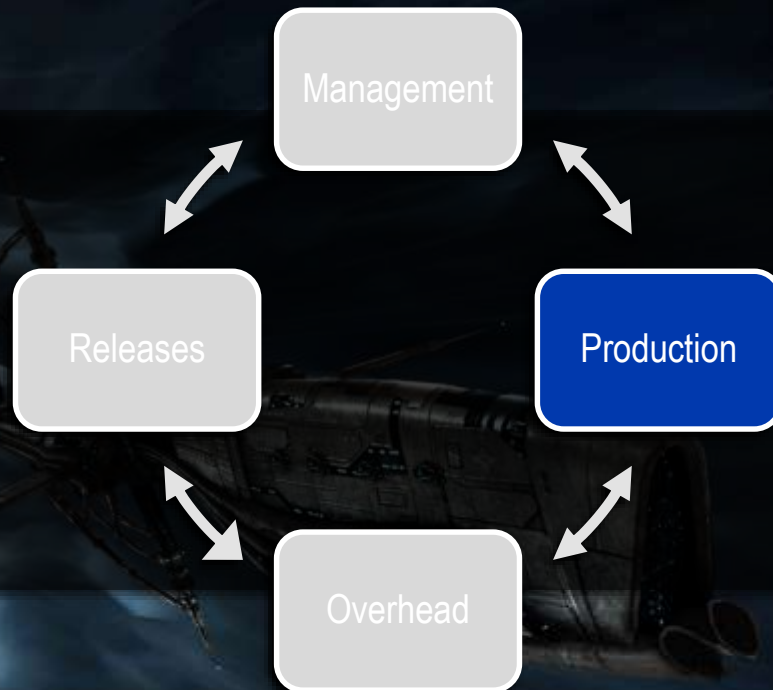

Utilize knowledge and skills
of the specialists

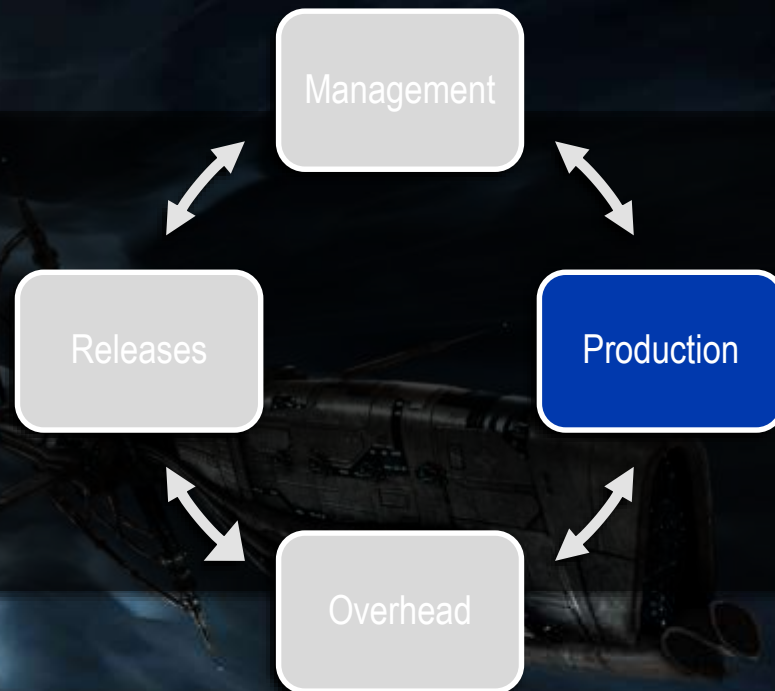

Teams are their own
product owners

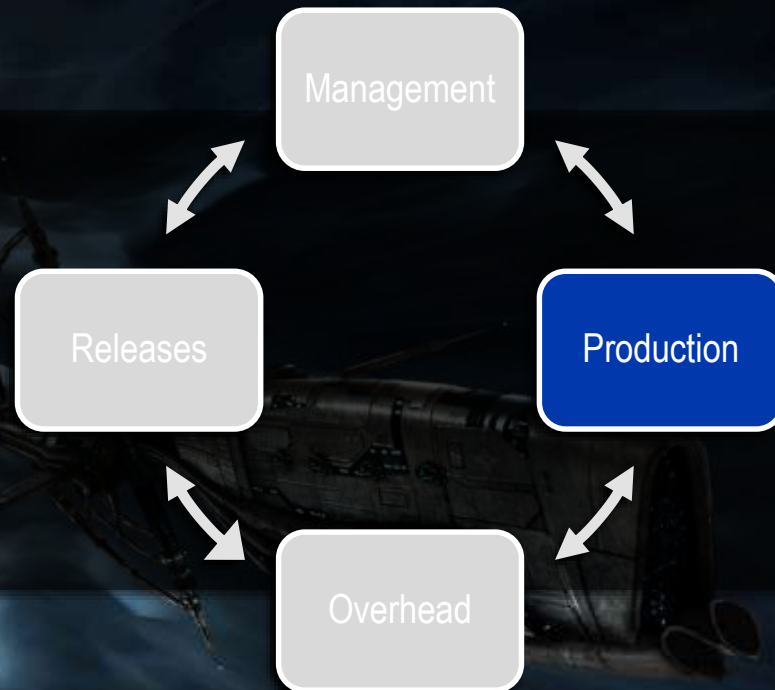

Trusted teams
Direction on demand

Development manager
Development producer

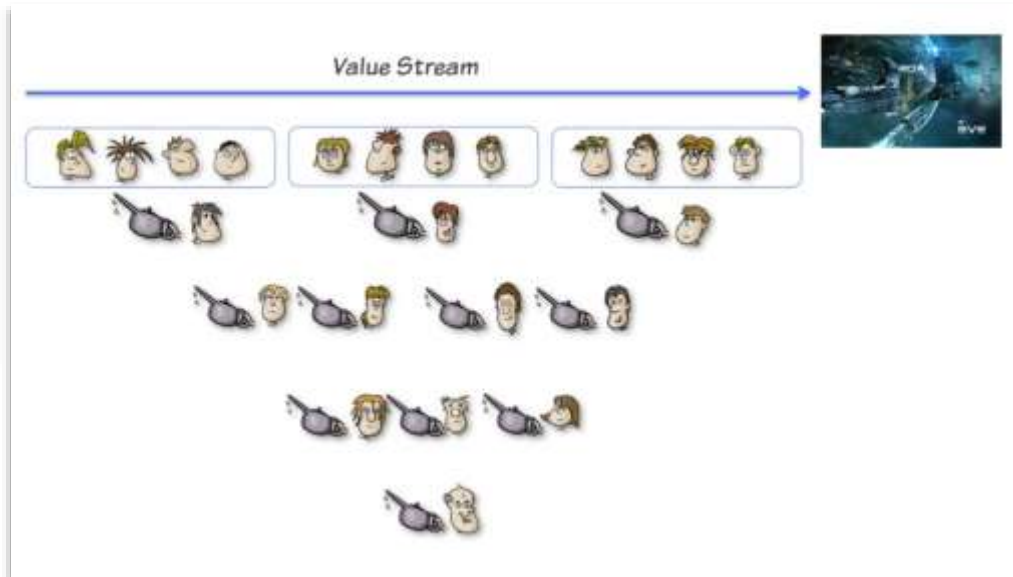

Optimization of processes
Communications hub
Help shape plans

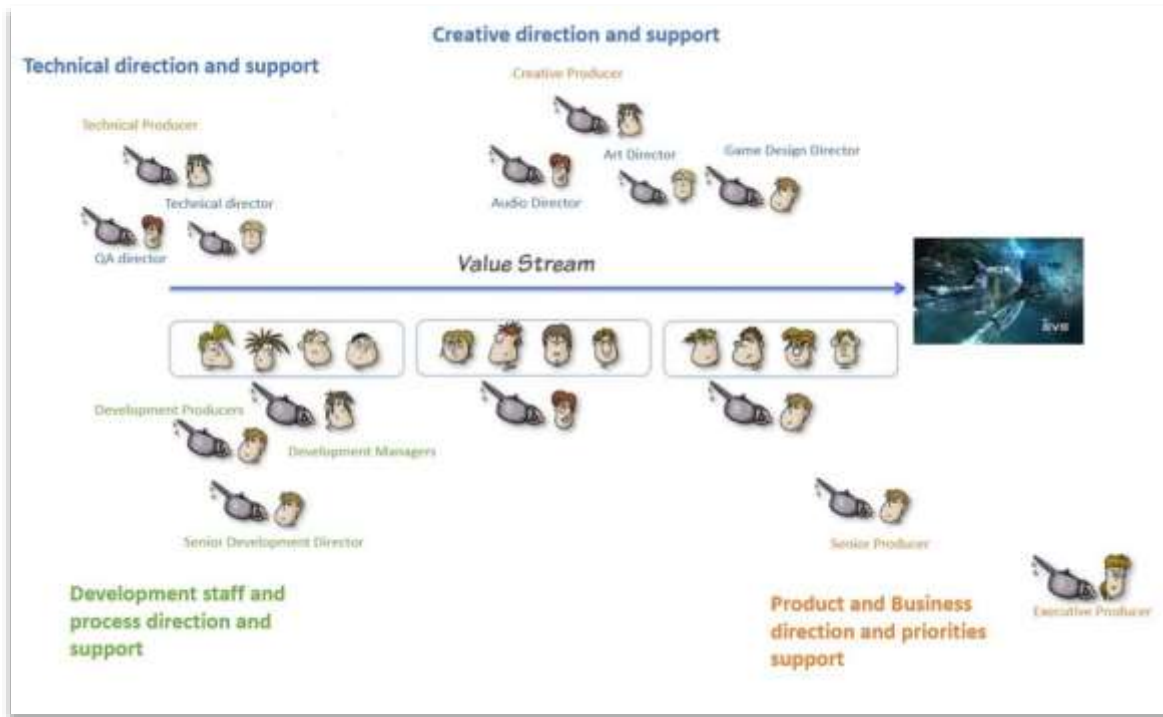

Less Overhead

Servant leadership

Current setup

We wanted

- ✓ To put focus on individuals and teams

We wanted

- ✓ To put focus on individuals and teams
- ✓ To identify the developers as the experts of our product

We wanted

- ✓ To put focus on individuals and teams
- ✓ To identify the developers as the experts of our product
- ✓ To work on the right things with the right people

We wanted

- ✓ To put focus on individuals and teams
- ✓ To identify the developers as the experts of our product
- ✓ To work on the right things with the right people
- ✓ Less overhead and more contributors
- ✓ To focus on value.

We did

- ✓ Change our release cadence to more frequent releases

We did

- ✓ Change our release cadence to more frequent releases
- ✓ Go from discipline based- to team-based management

We did

- ✓ Change our release cadence to more frequent releases
- ✓ Go from discipline based- to team-based management
- ✓ Implement servant leadership where everyone contributes to delivering value

We did

- ✓ Change our release cadence to more frequent releases
- ✓ Go from discipline based- to team-based management
- ✓ Implement servant leadership where everyone contributes to delivering value
- ✓ Give the PO role to the teams, putting our trust in the teams and the developers

We learned

- ✓ Releasing more frequently better allows for continuous improvement

We learned

- ✓ Releasing more frequently better allows for continuous improvement
- ✓ Team-based management accross disciplines makes more sence in an Agile organization
