

What Level Designers Bring to VR

Lee Perry - Big Dorks Entertainment

About me

- Epic Games, Squaresoft, Ion Storm, BitMonster
- Big Dorks Entertainment!
- Dream Team Partners!
- Level Design, Art, Scripting, Audio, Animation, Coding - Unreal, Unity... all the things...

The controversy

- Practicality
- Costs
- Sensationalism and backlash
- Design limitations
- Looks dorky
- Isolating

What *I* like about VR

- New creative frontier (not business frontier)
- Natural reactions of players
- Not the same cold war of visual fidelity
- Less crowded business space
- Unknowns... chance to rethink

VR matters to LDs because...

- “Meeting your models”
 - Valve Room example
 - Familiar content is new again
 - A more genuine, relatable, impressive form
 - The same is true for world geometry!

VR matters to LDs because...

- Scale matters
 - Unique to VR
 - Even small changes matter
 - Perception of characters change
 - Users change that perception
- It's an aspect of design in itself

VR matters to LDs because...

- Surroundings matter - "Danger rooms"

VR matters to LDs because...

- Surroundings matter - “Danger rooms”
 - Most important (?) aspect in VR, the setting
 - Design writes itself
 - Get a sense of scope early
 - Rapidly iterate in a small area
 - Giggle factor
 - Can quickly see dead ends

Case study

MOON
STRIKE

VR matters to LDs because...

- Environmental Emphasis
- Some genres are a natural fit
 - Less reliance on action dynamics
 - Natural instinct to inspect / observe
 - Chance at broader appeal

VR matters to LDs because...

- General design sense and scripting options
 - Not just geometry blocking
 - General controls
 - Interactions
 - Scripting sequences

VR matters to LDs because...

- Technical challenges
 - Performance
 - Shifting SDKs
 - Troubleshooting

VR matters to LDs because...

- We're unique!
 - Animation?
 - Concept art?
 - Physics?
 - Shaders?
 - Networking?
 - Modeling?
- BUT US?...

**LDs have the DEFINITIVE
skillset for VR!**

Challenges and limitations

- Movement issues
- Performance
- Kinder, gentler
- Session lengths
- Project scope
- Need new genres

Different Platforms!

It's... complicated

	Directional	Positional	Controllers	Free Move	Desk Scale
RIFT	Y	Y	MIXED	N	Y
VIVE	Y	Y	Y	Y	Y
PS VR	Y	Y	MIXED	N	Y
GEAR VR	Y	N	N	N	Y
THE VOID	Y	Y	Y	Y	N
FUTURE	?	?	?	?	?

CALL+0 ACTION

VR EDITION

- DANGER ROOMS!
- DO WHAT VR DOES WELL!

Thanks so much!
