#### **TAKE AWAY**

# CHALLENGES

#### **Challenges in Game Audio**

Non-Linear / Interactive

### CHALLENGES

#### Challenges in Game Audio (continued)

Cutting through the mix

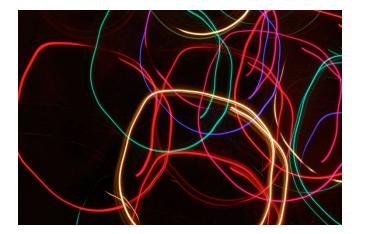

# SOLUTIONS

Adding Punch to sound design and music

Creating movement or modulation in sound design

### **DEFINING PUNCH**

#### **Punch by definition**

The power to impress or startle

Something that strikes you

#### TRANSLATING TO SOUND

#### How do you translate that so it relates to sound?

A signal with a predominant attack

A sound that "hits" you

υ IIBM

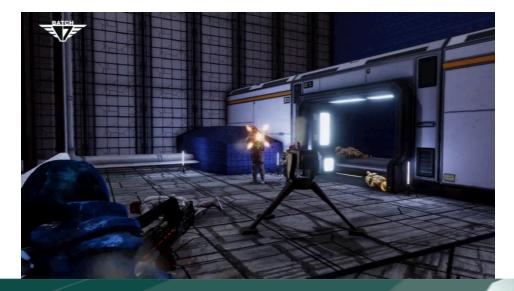

# WHY PUNCH?

#### Why is it important in Game Audio?

Powerful Explosions, Weapon Fire & Impacts

More dynamics in your interactive mix

U IRM.

# TOOLS

#### What tools can help me add punch?

**Transient Shapers**

# **MUSIC**

#### How can punch change music?

#### **SnowKing Music**

Octave duplication

Choice of instruments

Transient designer on a percussion bus

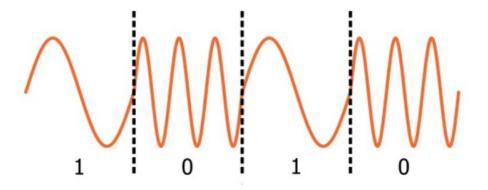

#### MOVEMENT

#### Modulation by definition

variation in the strength, tone, or pitch

# WHY MOVEMENT?

#### Why is it important in Game Audio?

Creating movement in sound design or music can help a sound stand out in a mix

Provides hard to pick up flat tones an ability to be recognized spatially

# TOOLS

#### What tools can help me add movement?

Tremolo Frequency Shifter Shuffling

# **TREMOLO**

#### SHUFFLING

# **FREQ SHIFTING**
