Reimagining Historical Settings in Game Design

Cole Wehrle (PhD, *You can trust me about this stuff.*)
Creative Director, Leder Games
Co-Founder, Wehrlegig Games

What I Hope to Share Today

1. Some different ways of understanding theme.
(Here we might spend too long talking about Catan.)
2. A simple framework for making history games.
(I'll give you tons of case studies so you can see this framework in action.)
3. What we stand to gain and lose.
(And why I think it's worth the hard work.)

Theme? — Mechanics?

Linguistic Metaphors

A Game Design as a Grammar

Theme as Vocabulary

As Gregor Samsa awoke one morning from uneasy dreams
he found himself transformed in his bed into a monstrous vermin.

Kafka, *Metamorphosis*

Diagram design by Pop Chart Lab

Word Bank

Gregor Samsa, found, himself, transformed, vermin,
monstrous, dreams, morning, uneasy, etc.

What are we making:

a creature or a conversation?

2. No Game is an Island

...even if it's about an Island.

Catan as a Language

- Catan's Grammar
 - a. Spatial Dynamics of the Map
 - b. Generation of Resources
 - c. Spending of Resources
 - d. Trading of Resources

(Boy, the game cares a lot about resources.)

- Catan's Vocabulary

Word Bank

Trade, Build, Wood, Ore, Sheep, Road,
Settlement, City, Robber, etc.

Contextualizing Settings with a Knowledge Map

Greg Loring-Albright,
 “First Nations of Catan: Practices in
 Critical Modification” (2015)

An 1872 representation of "American Progress" associated with the Frontier Myth. Public Domain.

Settlers of Catan, both by its title and its thematic elements, situates itself as a game about settling new land. While the game does not root itself in any historical reality, playing it in the U.S. creates a link to the real historical settlement and concurrent genocide of indigenous peoples. Consider the “frontier myth,” a phrase that describes the work of Frederick Turner Jackson, whose 1893 essay “The Significance of the Frontier in American History” attributes the rapid development of the U.S. in the late 19th century, and the specificity of the U.S. American character, to mystical forces contained in the “empty” and thus edenic American West.³ *Settlers of Catan*, by allowing its settlers to find the island of Catan in a similarly edenic state, reifies this myth, which helped to render American Indians invisible. Thus, *Settlers of Catan*, when played in the U.S., is complicit in continuing to make indigenous communities invisible. Primarily in order to counter this troubling aspect of *Settlers of Catan*, and to create a game that I feel comfortable playing, I have designed a variant of *Settlers of Catan* titled *First Nations of Catan*.

CURRENCY

THE MAN WHO BUILT CATAN

By Adrienne Raphael

February 12, 2014

After Barbarossa, Teuber designed several other games and won two more Spiel des Jahres awards, but he was still working fourteen-hour days in the dental lab. In 1991, after reading histories of Viking life, he became fascinated with Iceland and the age of discovery. “What was it like when they reached this virgin island?” he said. “I wanted to find out.” He tinkered with an island-settling game for four years, testing versions on his wife and children every weekend. Initially, the instructions included lots of complicated mechanics—for example, if you had enough cities and settlements in a cluster, you could create a metropole—but eventually, Teuber said, “I cooked it to the heart of the game.” A breakthrough moment came when Teuber experimented with using hexagonal tiles instead of squares for his board. He said he had a dream that he remembered having once before, the last time he won the Spiel des Jahres: “I was standing on the shore of a pond and saw very big fish, and I angled the biggest of them.”

A Responsibility to Games

Catan by way of Capcom (2002, 2004)

Photos by Dottor_Destino (BGG)

A collage of historical and cultural items related to the American West, arranged within a large green circular frame. The items include:

- A map of the United States showing the Pacific Ocean, Atlantic Ocean, Gulf of Mexico, and Caribbean Sea. A legend indicates the location of the first European settlement.
- A timeline of hats from 1687 to 1736, showing various styles and materials.
- A game box for "The Settlers of Catan" by Klaus Teuber, featuring a yellow and red design.
- A collection of tools, including axes, hammers, and saws, arranged in a grid.
- A painting of a group of pioneers on horseback, traveling through a landscape.
- A box for "John Company" by the John Company, featuring a red and white design.
- A model of a three-masted sailing ship, likely a galleon or frigate.
- A family tree diagram titled "THE CHRISTIAN FAMILY TREE" showing the lineage of various religious groups.

Let's go make (*and play*)
better games about history.
