Where It All Began...

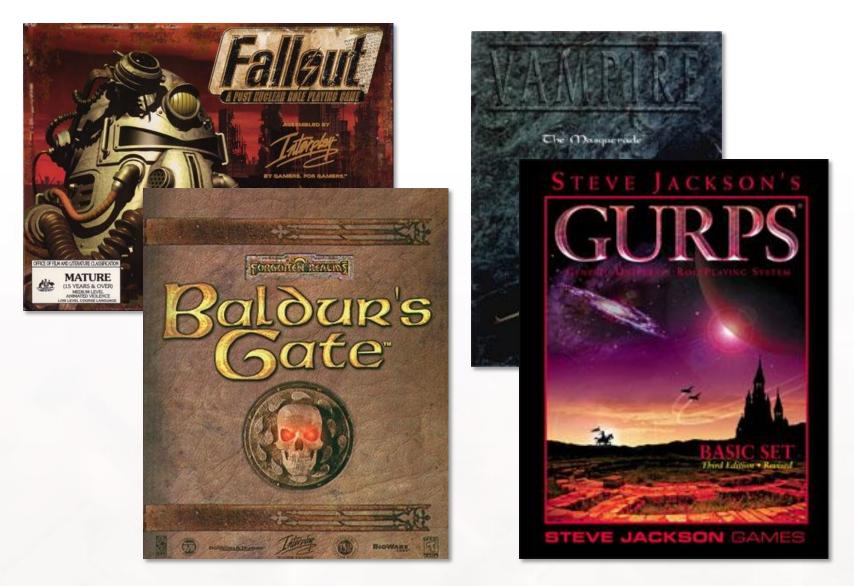

FANTASY ROLE-PLAYING GAME

SET 1: BASIC RULES

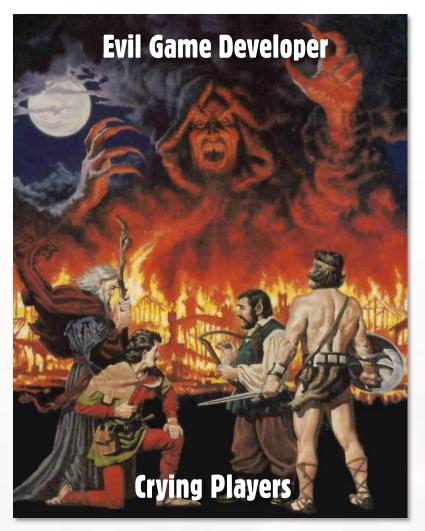

This game requires no gameboard because the action tokes place in the player's imagination with dungeon adventuries that include monstera, troasures and magie, deal for 3 or more beginning to intermediate players, ages 10 and up.

Gateway to Game Development

"[Mechanic] is Pretty Good... For an RPG"

Whyyyyyyy?

- Repeat errors despite feedback
- Ignore established mechanics
- Disregard smart players
- Attend to "vocal" players
- We do not consider the player's experience to be more important than a design idea or an audience expectation

Five Hard Lessons

- Part 1: Mechanical Chaos Is Frustrating
- Part 2: What You Perceive Matters Most
- Part 3: Strategic Failures Feel Terrible
- Part 4: Player vs. Character Is a False Dichotomy
- Part 5: Good Gameplay > Ideas & Expectations

Caveat Audiens

- We *All** Make Mistakes
- Strategy and Tactics
- Not Anti-Turned Based, Not Even Anti-Randomization
- RPG Definitions: Take 'Em or Leave 'Em
- ... But no MMORPGs
- "Nobody" = Somebody, Probably **

*mostly other guys, though.

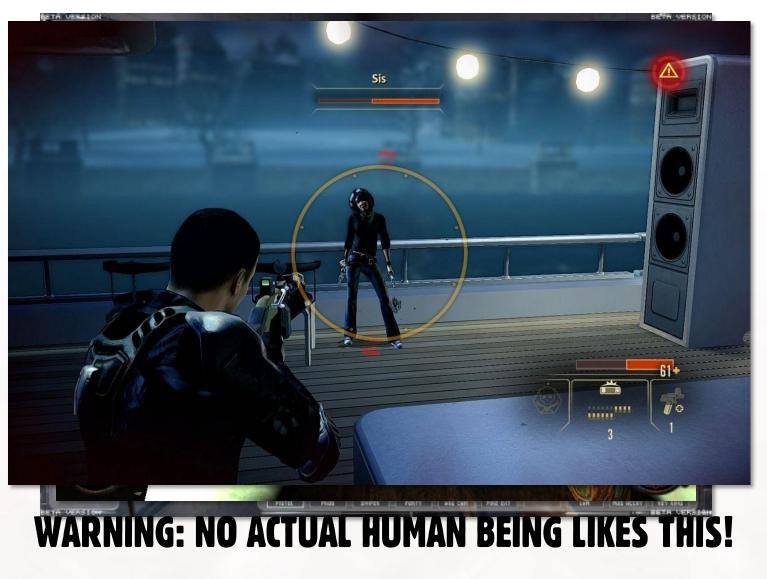

** probably you

Part 1: Mechanical Chaos is Frustrating

Randomized Accuracy

Randomized Lockpicking / Hacking / Speech / Crafting

Case Study: F:NV Casino Gambling

Problems

- Player Expectation of Casing
- Real Casino Games are H
- Results Can Be Avoided V load
- Potential Economy Breaker
- Negative Reaction to Limits

Solutions

- Three Low-Impact Casino Games Luck Stat Only Improves Odds
 - Cheating Measures On Load
 - Accept Max Winnings
- Reward Hitting the Limits

Elder Scrolls, Deus Ex : Combat Evolved

Mass Effect 1 vs. 2: Combat *More* Evolved

Mass Effect 3 : Even Better?!

Part 2: What You Perceive Matters Most
