

Animation Methodology for Battlefield 3

Tobias Dahl Animation Director

Mikael Högström Lead Animator

BATTLEFIELD
3

AGENDA

- BF3 on a high level
- BF3 from an animation perspective
- New animation technology ANT
- New animation features
- Working as an animator at DICE
- Conclusions
- Fun stuff
- Questions

BF3 what do we need?

- Realistic Multiplayer animations
- Super realistic AI animations
- Immersive 1p animations with lower body
- Easy AI scripting interface
- Realistic Facial animations
 - 4D scanning, FaceForward
 - Performance Capture
 - Through the gun experience, new weapon spring
- Object animation, Canned destruction, gadgets etc.
- Entity space animation, ground -> vehicle -> ground
- First Person Camera
- Uneven terrain
- Foot planting
- Casting
- Animation prototypes
- IK
- Streaming of animations
- Turn system for AI
- Realtime blending tweaks
- FIFA locomotion for AI
- NBA Street locomotion for MP
- Seamless blending from Gameplay -> Cutscenes -> Gameplay
- 100's of weapons and gadgets
- Etc. Etc. Etc.

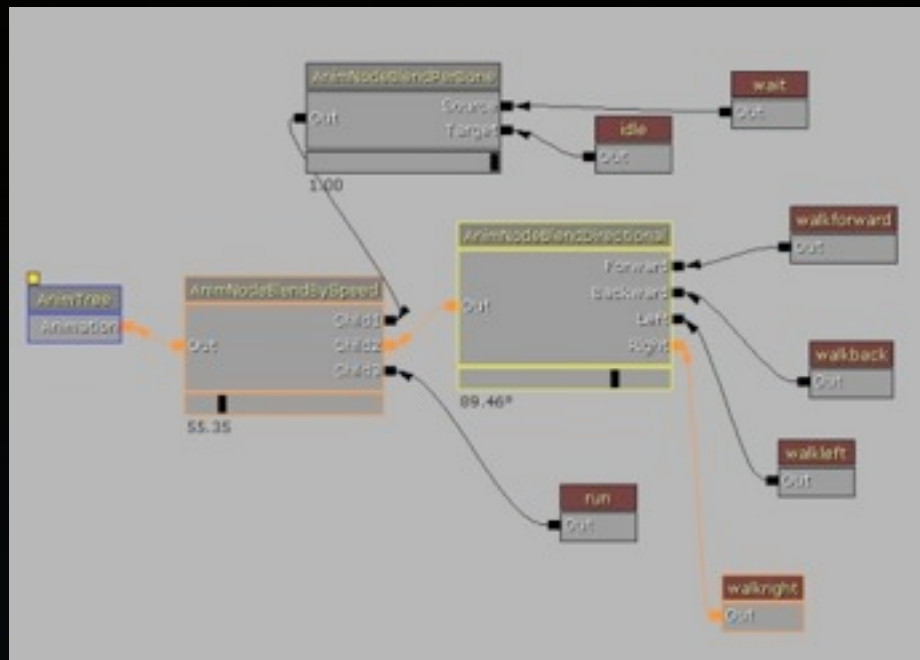

Animation Toolset and Methods

- What methods did we use to achieve our animation goals?
 - Blends
 - Seamlessness
 - Input driven animation
 - Layering
 - Realtime Feedback

Animation Toolset and Methods

- Blends

- Animators are responsible for all blends in the game
- Per Joint blending

FPS: 99.76 (0)
Active soldiers/actors: 1/0
Active vehicles: 0
Total vehicles: 0

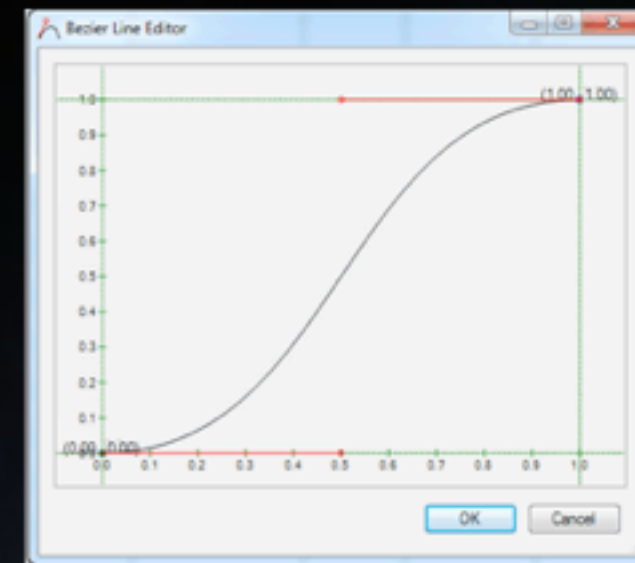

100

WRESTROOM

Animation Toolset and Methods

- Seamless
 - Speed is more important than pose
 - Aligning over time is a choice made by the animator

Animation Toolset and Methods

- Input driven animation (Multiplayer/1st Person)
 - Multiplayer = Gameplay over realism

BF3 animation features

WeightShift on direction change

FPS: 105.87 (0)
Active soldiers/actors: 1/0
Active vehicles: 0
Total vehicles: 0

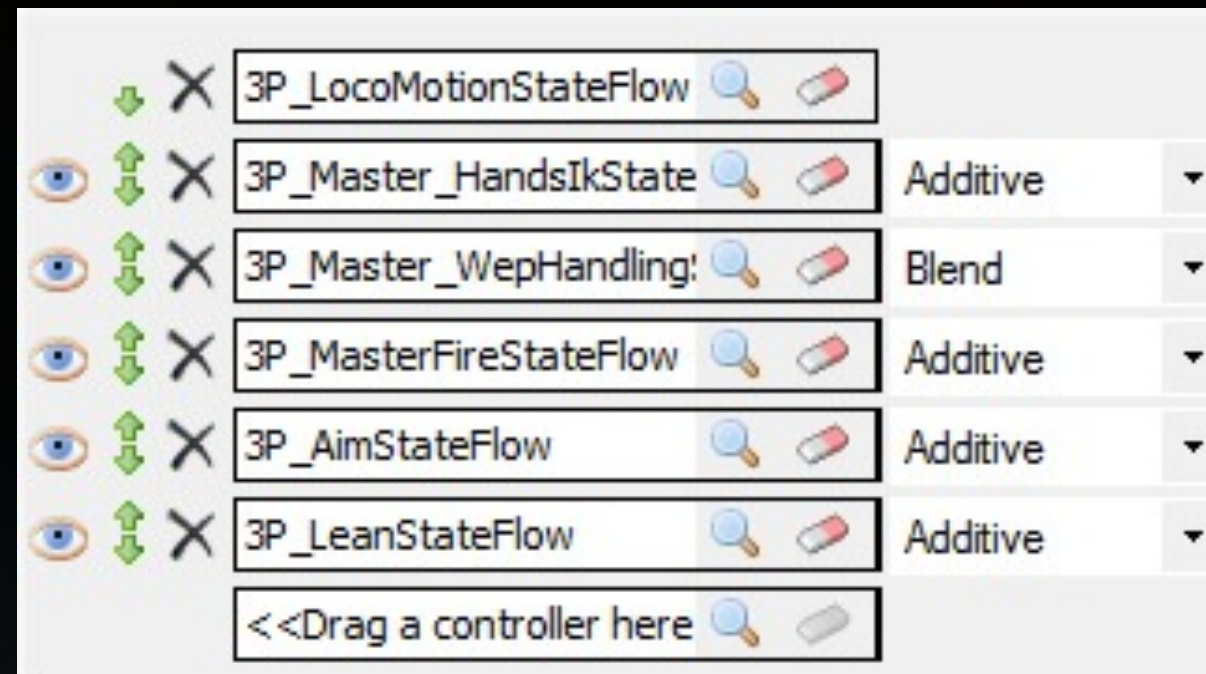

95

Animation Toolset and Methods

- Layering

- Seperate UpperBody/LowerBody
- Great for fast prototyping of features
- Additative solutions to handle multiple weapons setup

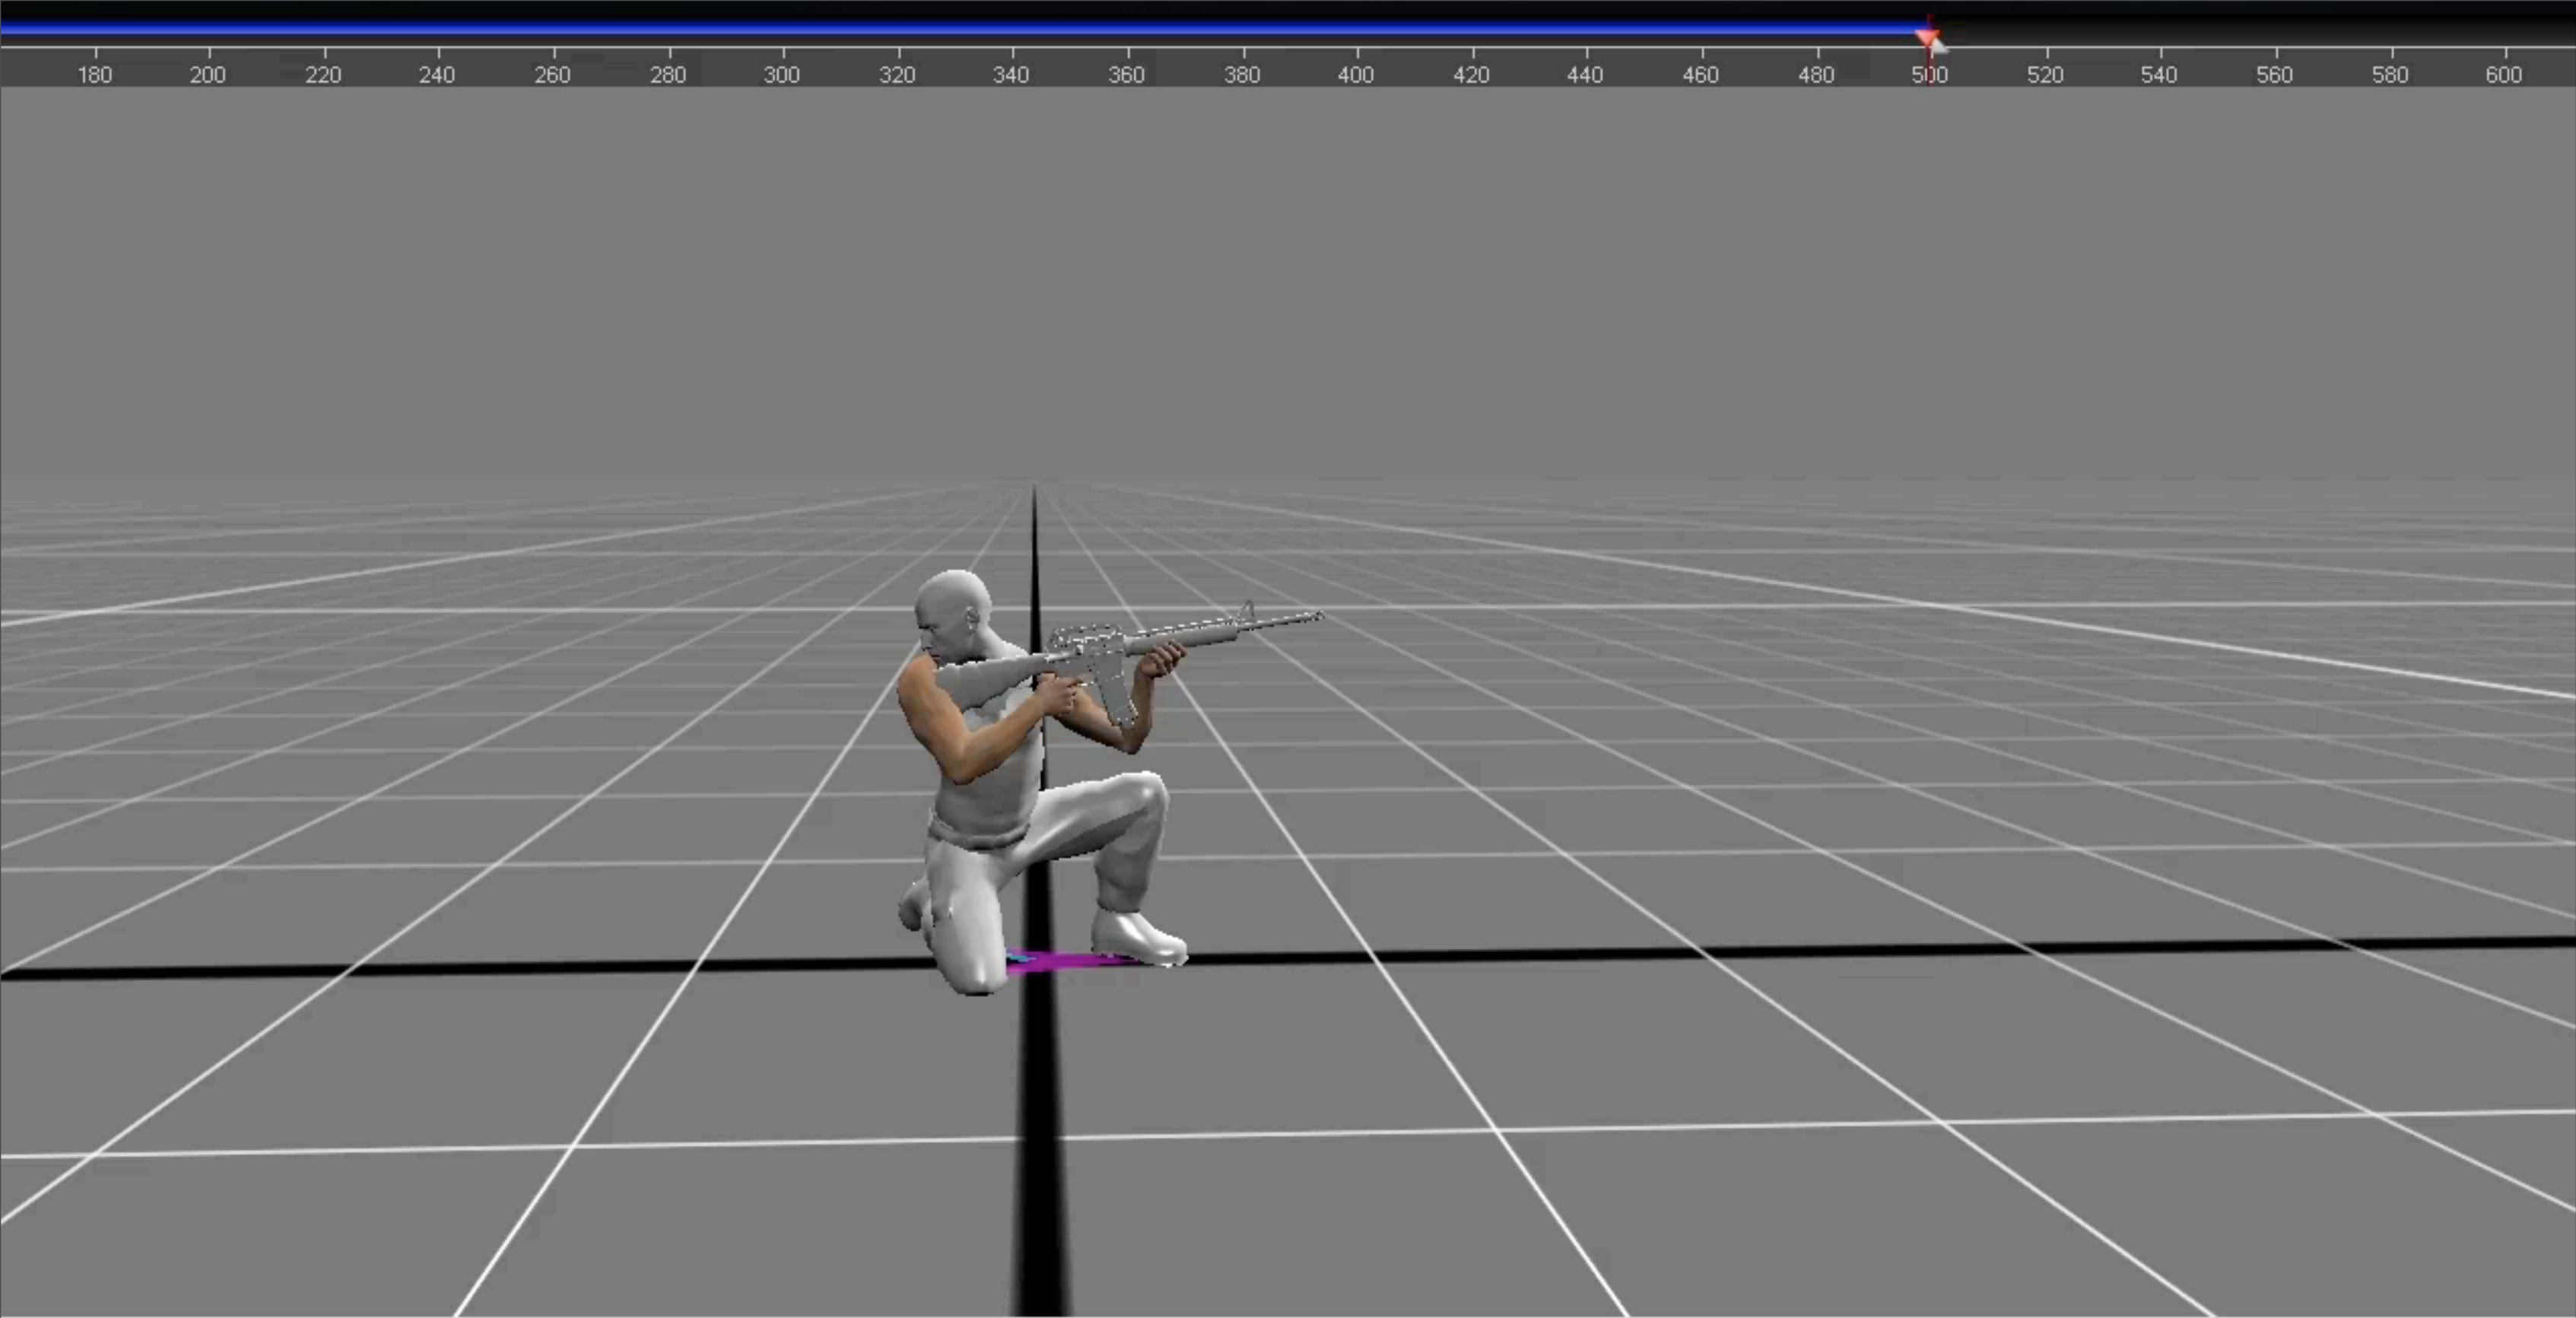

Animation Toolset and Methods

- Realtime Feedback

BATTLEFIELD 3

DICE

Animation Toolset and Methods

- Most features are implemented by animators
 - Fast prototyping
 - Not destructive to gameplay

BATTLEFIELD 3

DICE

AI Movement Scripting

- Easy intuitive way of making the AI move
- Seamless blending into canned animations
- Use metaphors like "Combat" "Relaxed" instead of picking animations from long lists

BATTLEFIELD 3

DICE

Object Animation

- To animate objects like a toy dinosaur or an earthquake
- In-game pre-fab level art objects like vehicles trees etc.

BATTLEFIELD 3

DICE

HE_Residential_0
Layer: HeatMarke

Face Forward (4D Scan)

- Realistic facial animation
 - There is nothing more real than reality
 - Real time 3D mesh scanning
 - Real time Diffuse scanning
 - Real time Bump map scanning

Motion Capture Body Data

BATTLEFIELD 3

DICE

Face Forward (4D Scan)

BATTLEFIELD 3

DICE

Animators role at DICE

BATTLEFIELD 3

DICE

Animators role at DICE

Animators role at DICE

There are no animators at DICE...
...in a traditional sense

BATTLEFIELD 3

DICE

Animators role at DICE

- Game animators has moved beyond the traditional animator role
- From the beginning to the end, game makers instead of animators
 - Creating Previz for mocap
 - Planning mocap shoots
 - Directing actors, stunts and working with military advisors
 - Combining and tweaking the data after the Animation Directon

Conclusions

- We are making games, not animations!
- Knowledge of animation principles still important, but directing, clarity, physical etc. Even more important
- A lot more responsibility for the animators than ever before
- More interesting than ever to work as an animator in the game industry
- More fun!

FPS: 39.28 (1)
Active soldiers/actors: 34/0 (max 24)
Active vehicles: 10 (max 6)
Total vehicles: 34 (max 12)
