

Designing Compelling AI Character Interactions in VR Using Body Language

Vivian Tan
Co-Founder & CEO, Beast Inc.

About Beast, Inc.

- We make AI-driven virtual pets!
- We create [Beast Pets](#) - VR sandbox baby dragon simulator

What is Body Language?

“Body Language”

In this context, a holistic term that encompasses:

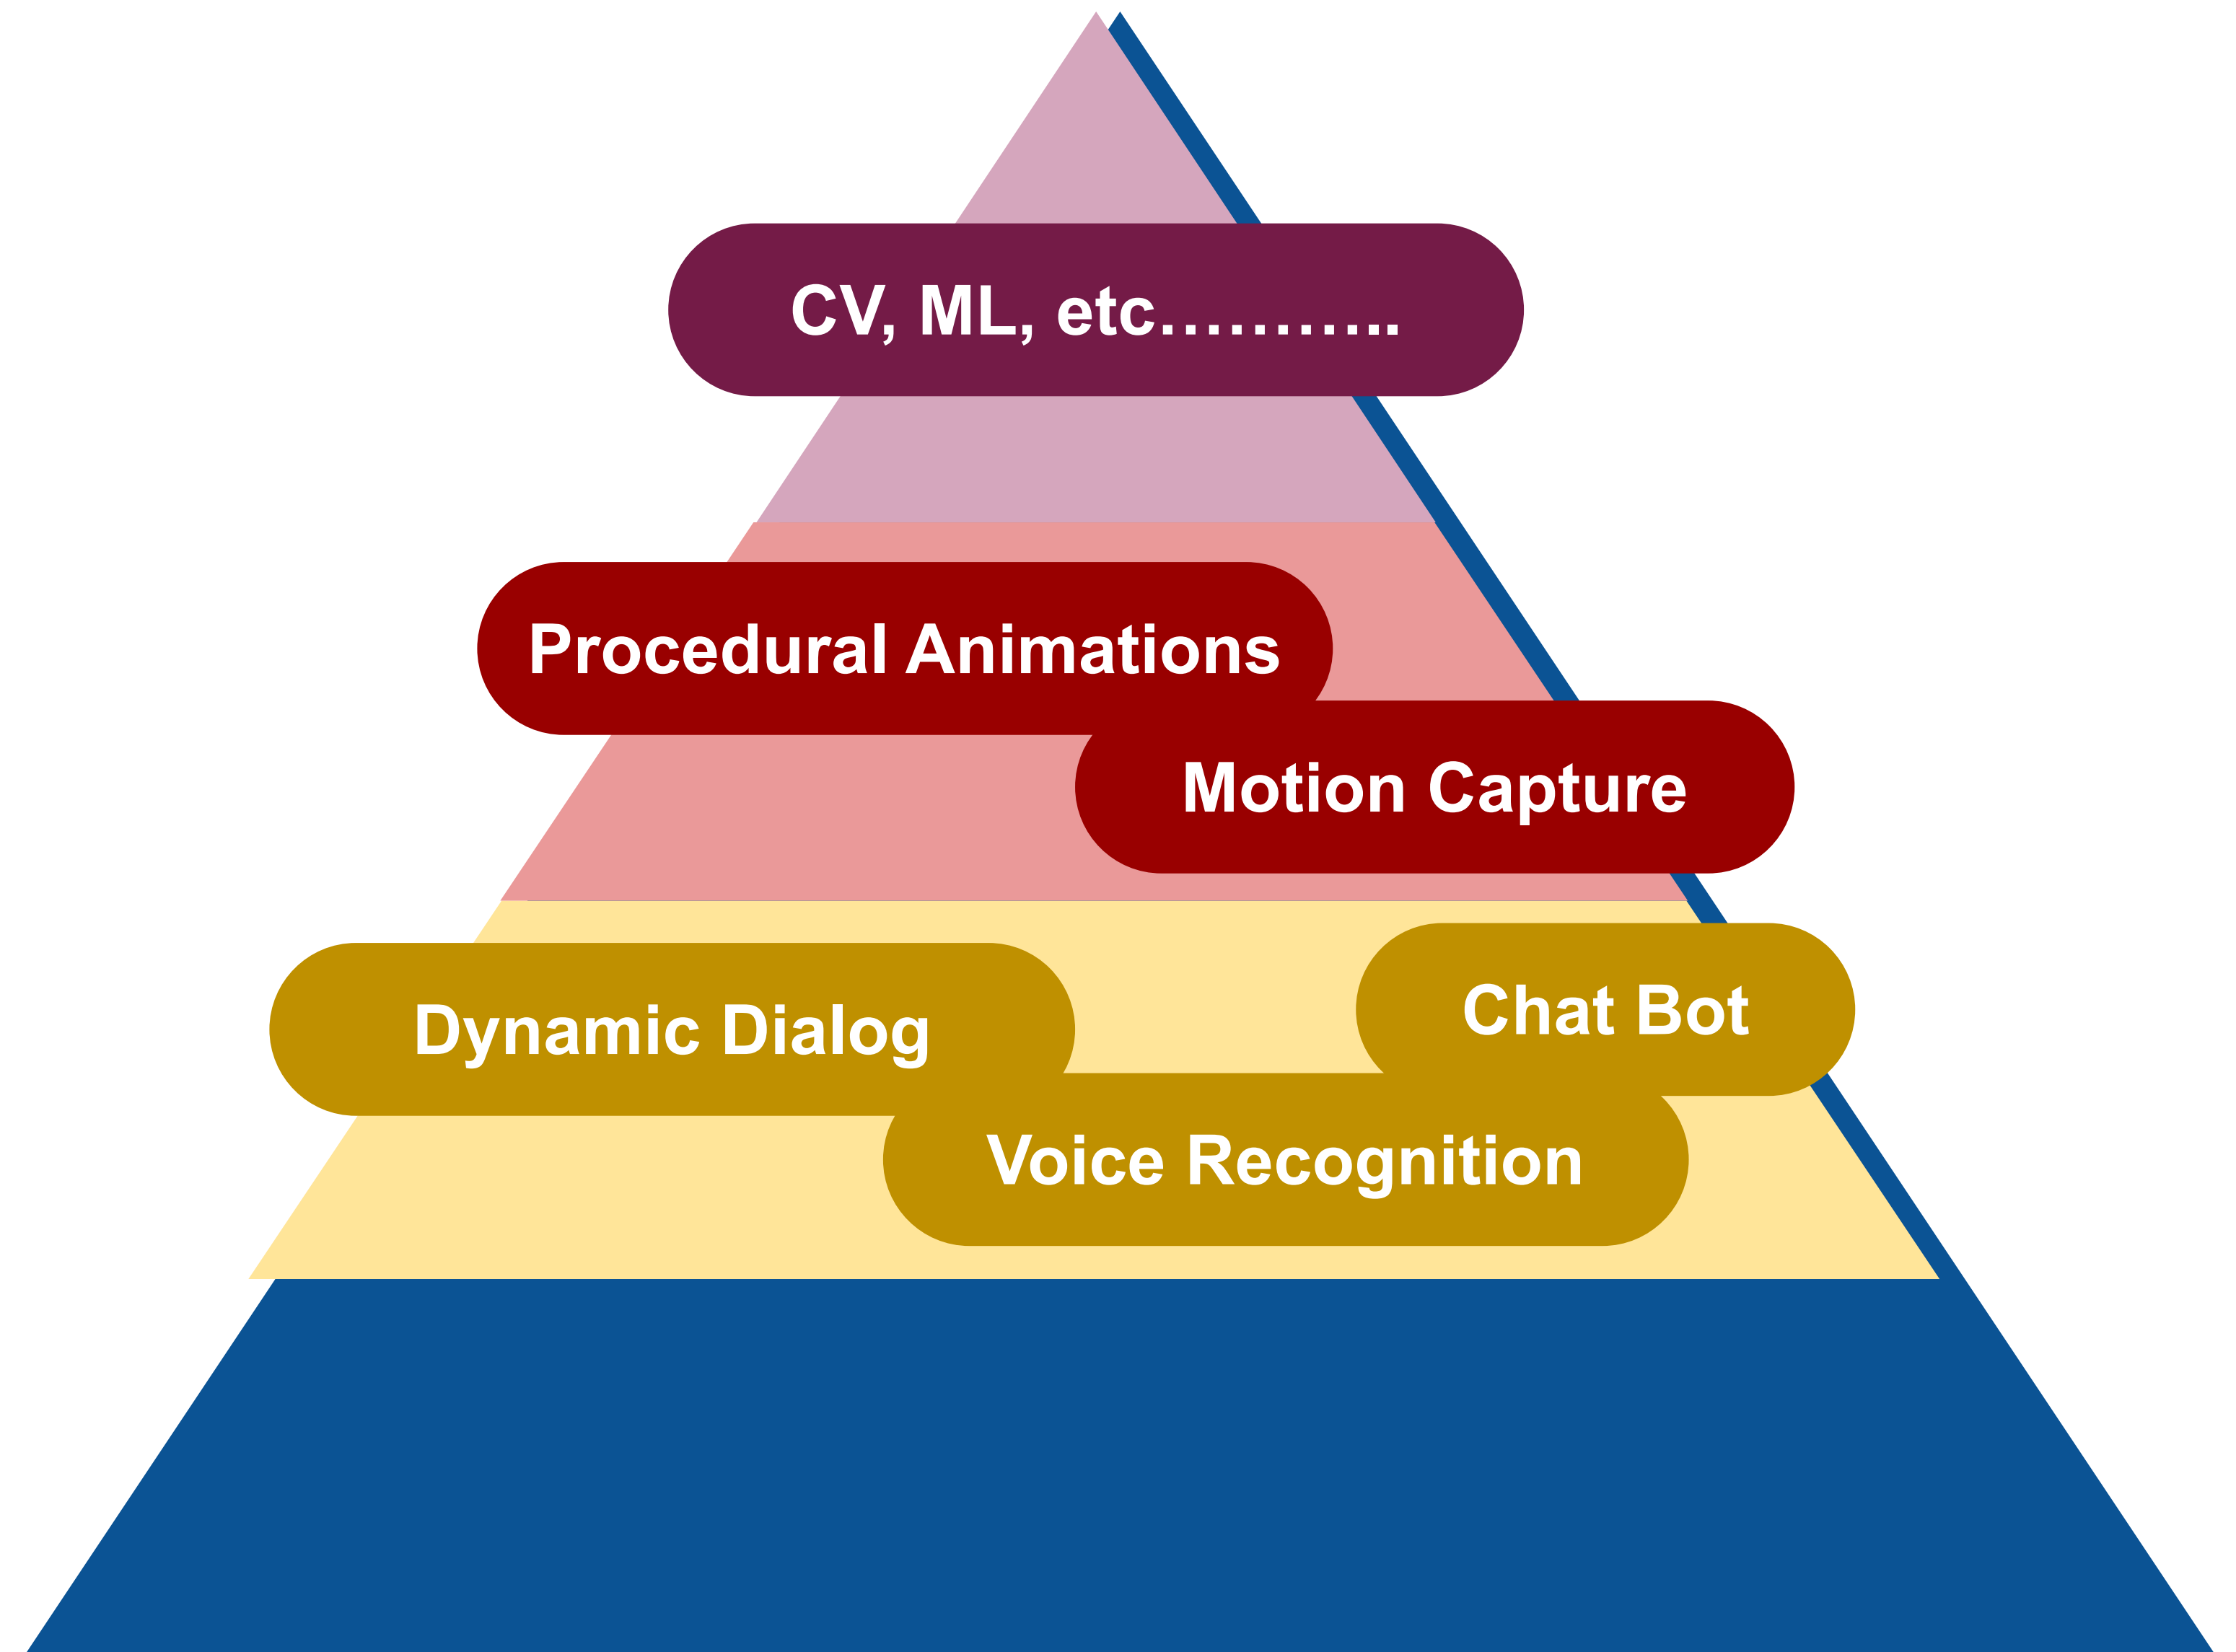

- Physical presence
- Spatial interactions
- Eye contact
- Player gestures

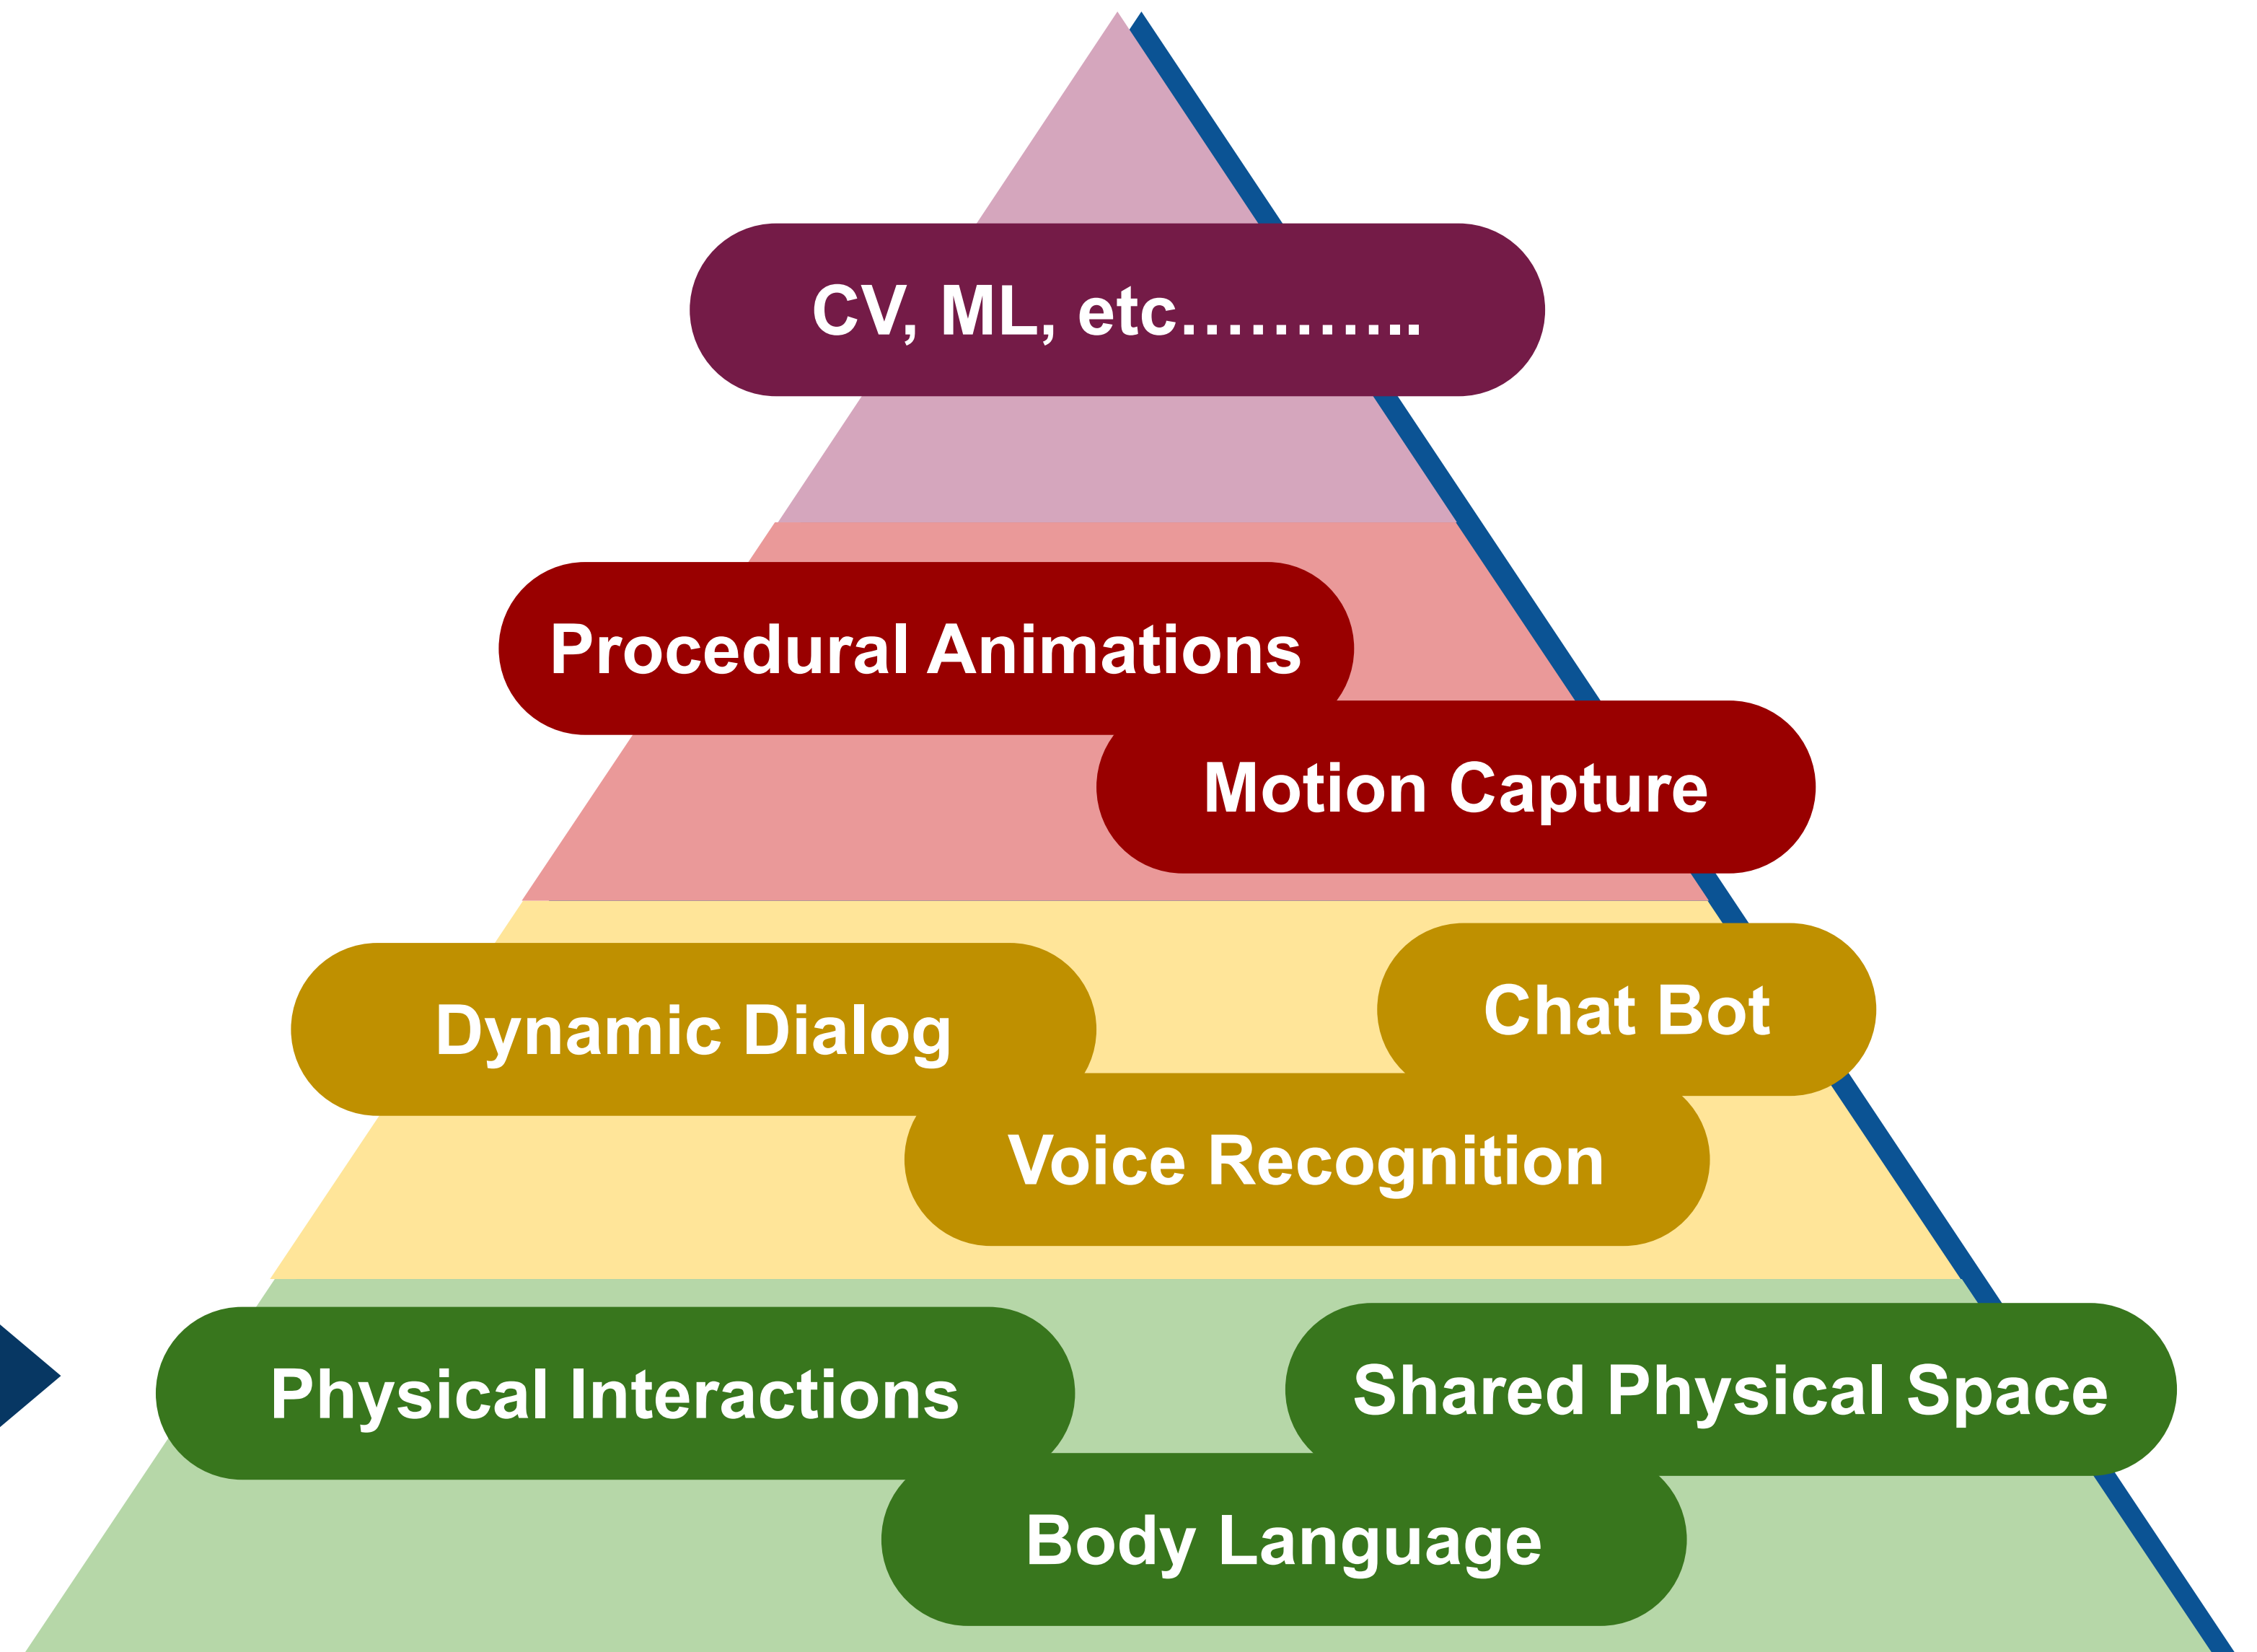

Why Body Language?

“Wish List” for making awesome AI characters

Foundational interactions

By Using Body Language, We Can:

- Establish power dynamics
- Establish context, relationship, intent
- Prompt players to perform desired actions
- Minimize reliance on dialog, subtitles, menus
- Build foundation for more complex AI behaviors

Scale and Power Dynamics

Scale and Power Dynamics

Tiny Characters

- Player has control
- Player role:
 - build
 - guide
 - protect
 - manipulate

Tiny Character Example

"Moss" Image & Logo ©Polyarc

Giant Characters

- Player has little control
- Player role:
 - observe
 - avoid
 - learn

Giant Character Example

theBlu

“theBlu” Image & Logo ©Wevr

Giant Character Example

"Sky Rim" Image & Logo ©Bethesda

Normal Sized Characters

Normal Sized Character Example

"First Steps" Image & Logo ©Oculus

Normal Sized Characters

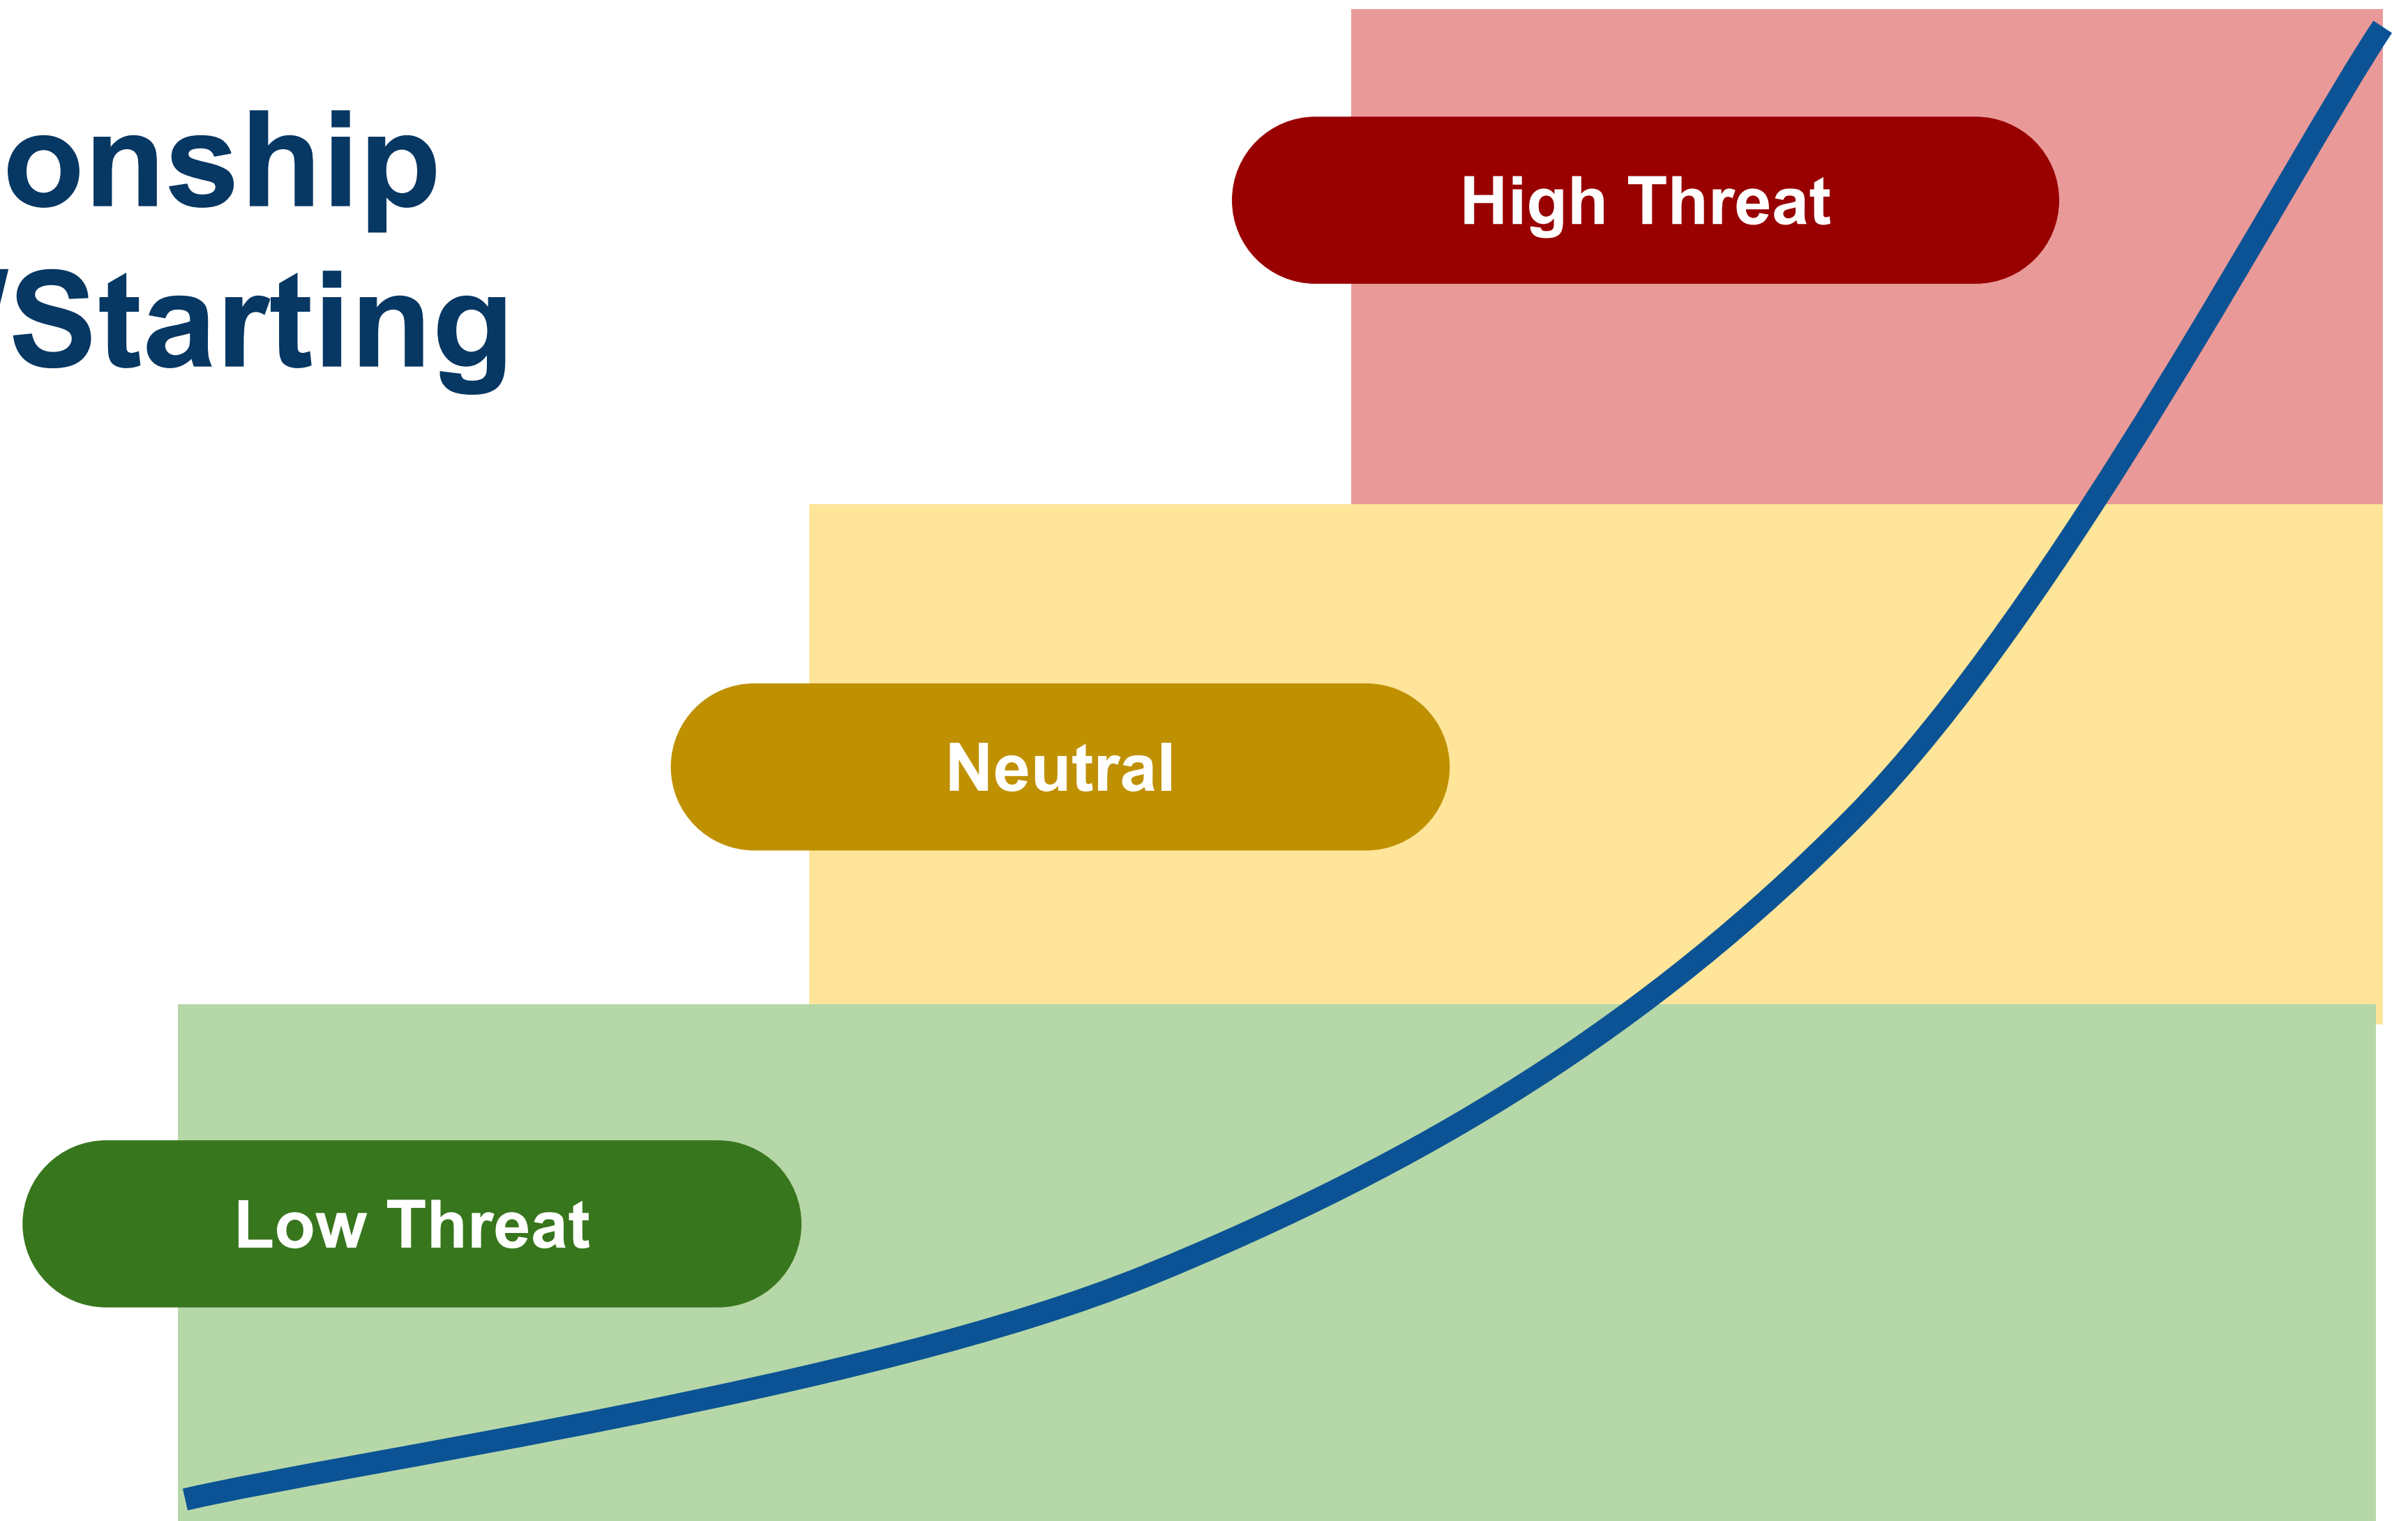

- Friendly characters: smaller/shorter than player
- Enemy characters: can be larger or smaller than player
- Dynamically scale character height to match player

Vertical Space

Define Relationship With Default/Starting Positions

Examples

Low Threat

© Valve

Neutral

© Beast, Inc.

© Beat Games

High Threat

© I-Illusions

Proximity

Active vs Passive Characters

Active

Passive

Active vs Passive Character Example

"Gorn" Image & Logo © Free Lives

Prompt Player Movement

Stationary

Walk

Teleport

Eye Contact

Eye Contact & Field of View

Attention Pressure

Attention Pressure Variables

- Proximity to player
- Direct eye contact
- Number of AIs

Attention Pressure Variables

- Proximity to player
- Direct eye contact
- Number of AIs

Attention Pressure Variables

- Proximity to player
- Direct eye contact
- Number of AIs

Low pressure encourages exploration

Attention Pressure Variables

- Proximity to player
- Direct eye contact
- Number of AIs

Hand Gestures

Hand Gestures Reinforce Roles

- Treat hands as tools
- Applies to players and AI characters
- Only allow hand gestures you want players to use
- Open palm = friendly, waving, high-five
- Closed fist = hostile, punching

Hand Gesture Examples

“Vacation Simulator” Image & Logo © Owlchemy Labs

CREED
RISE TO GLORY™

“Creed” Image & Logo © Survios

How To Know If Any Of This Works?

- Playtest
- Playtest with different types of people
- Playtest some more!

Thank You!
