## HEAVEN'S VAULT

Marc Blank, 1982

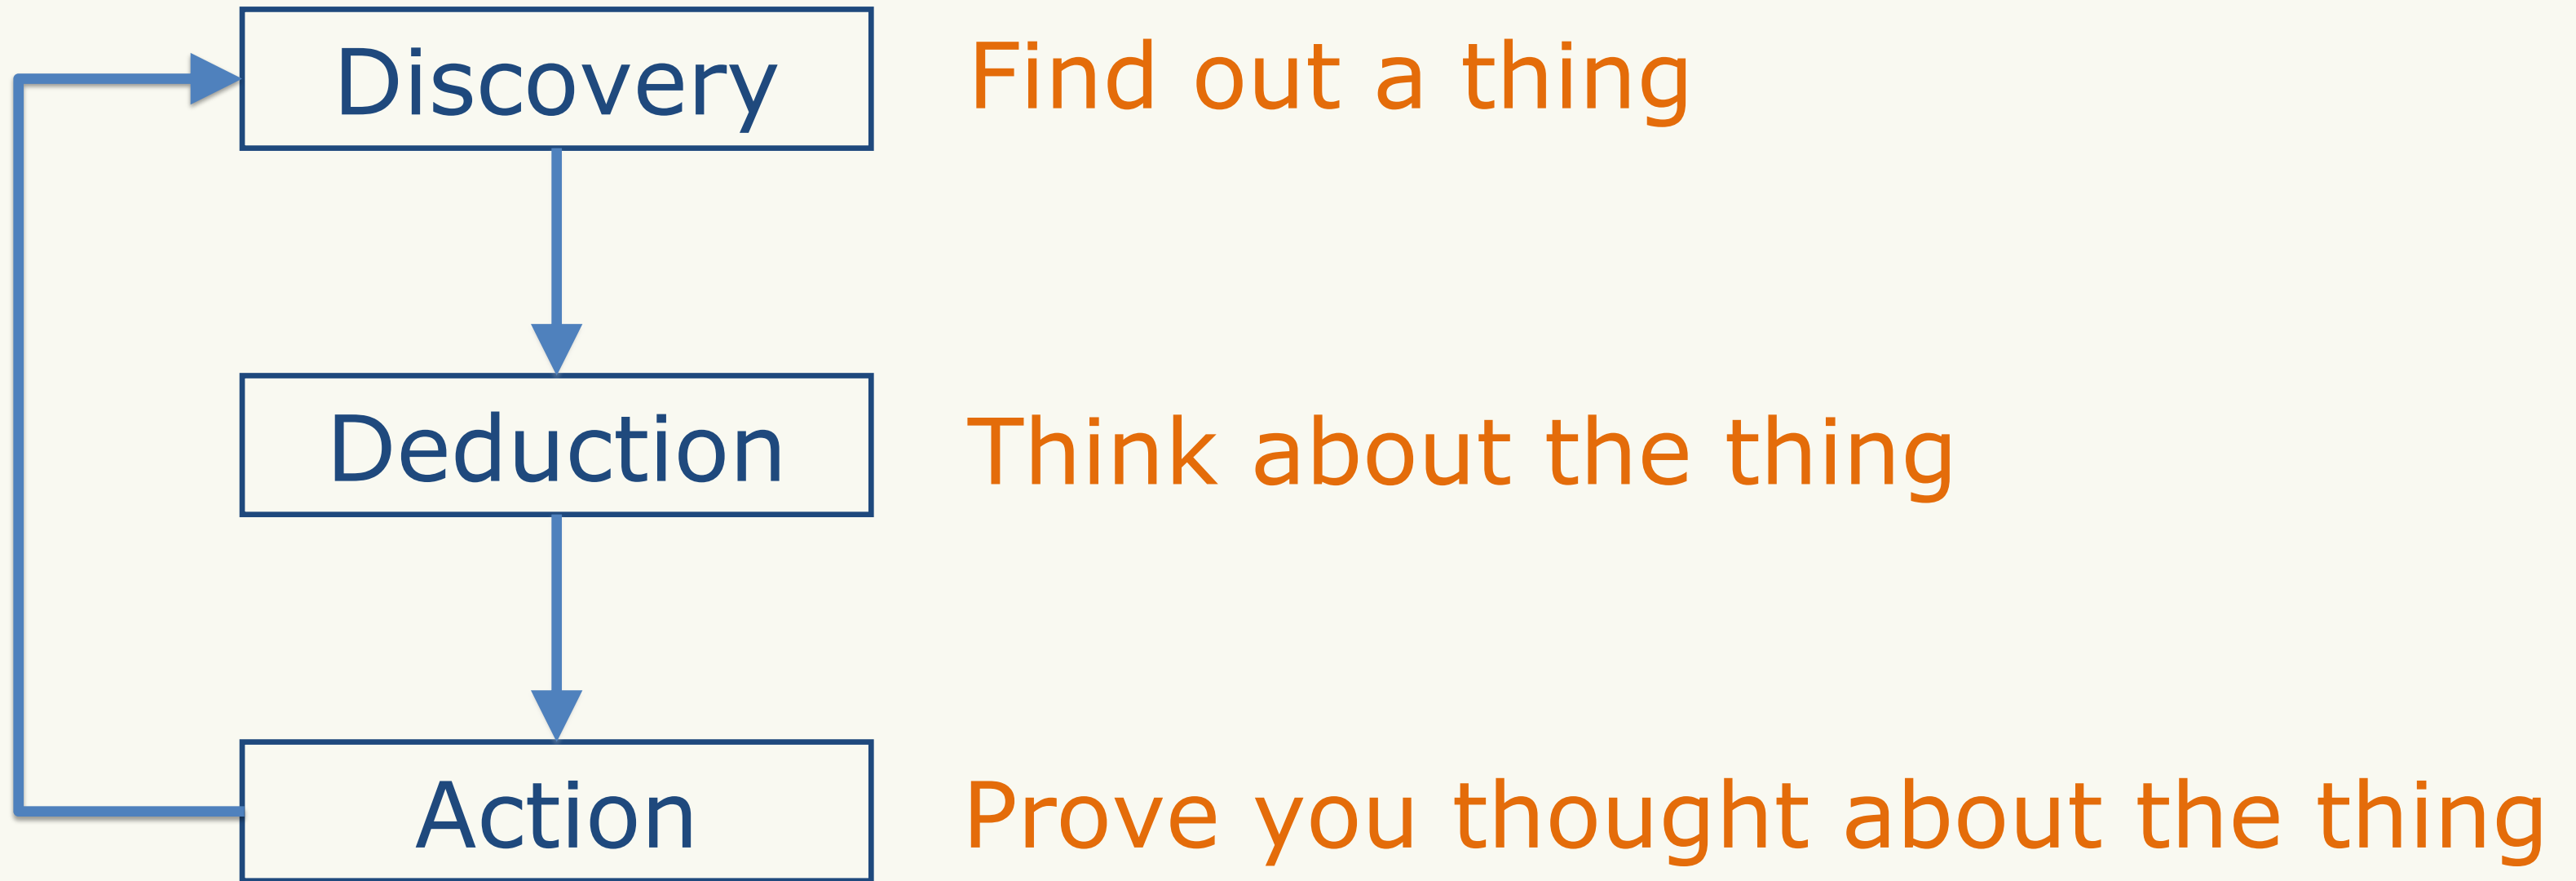

Dave Lebling, 1984

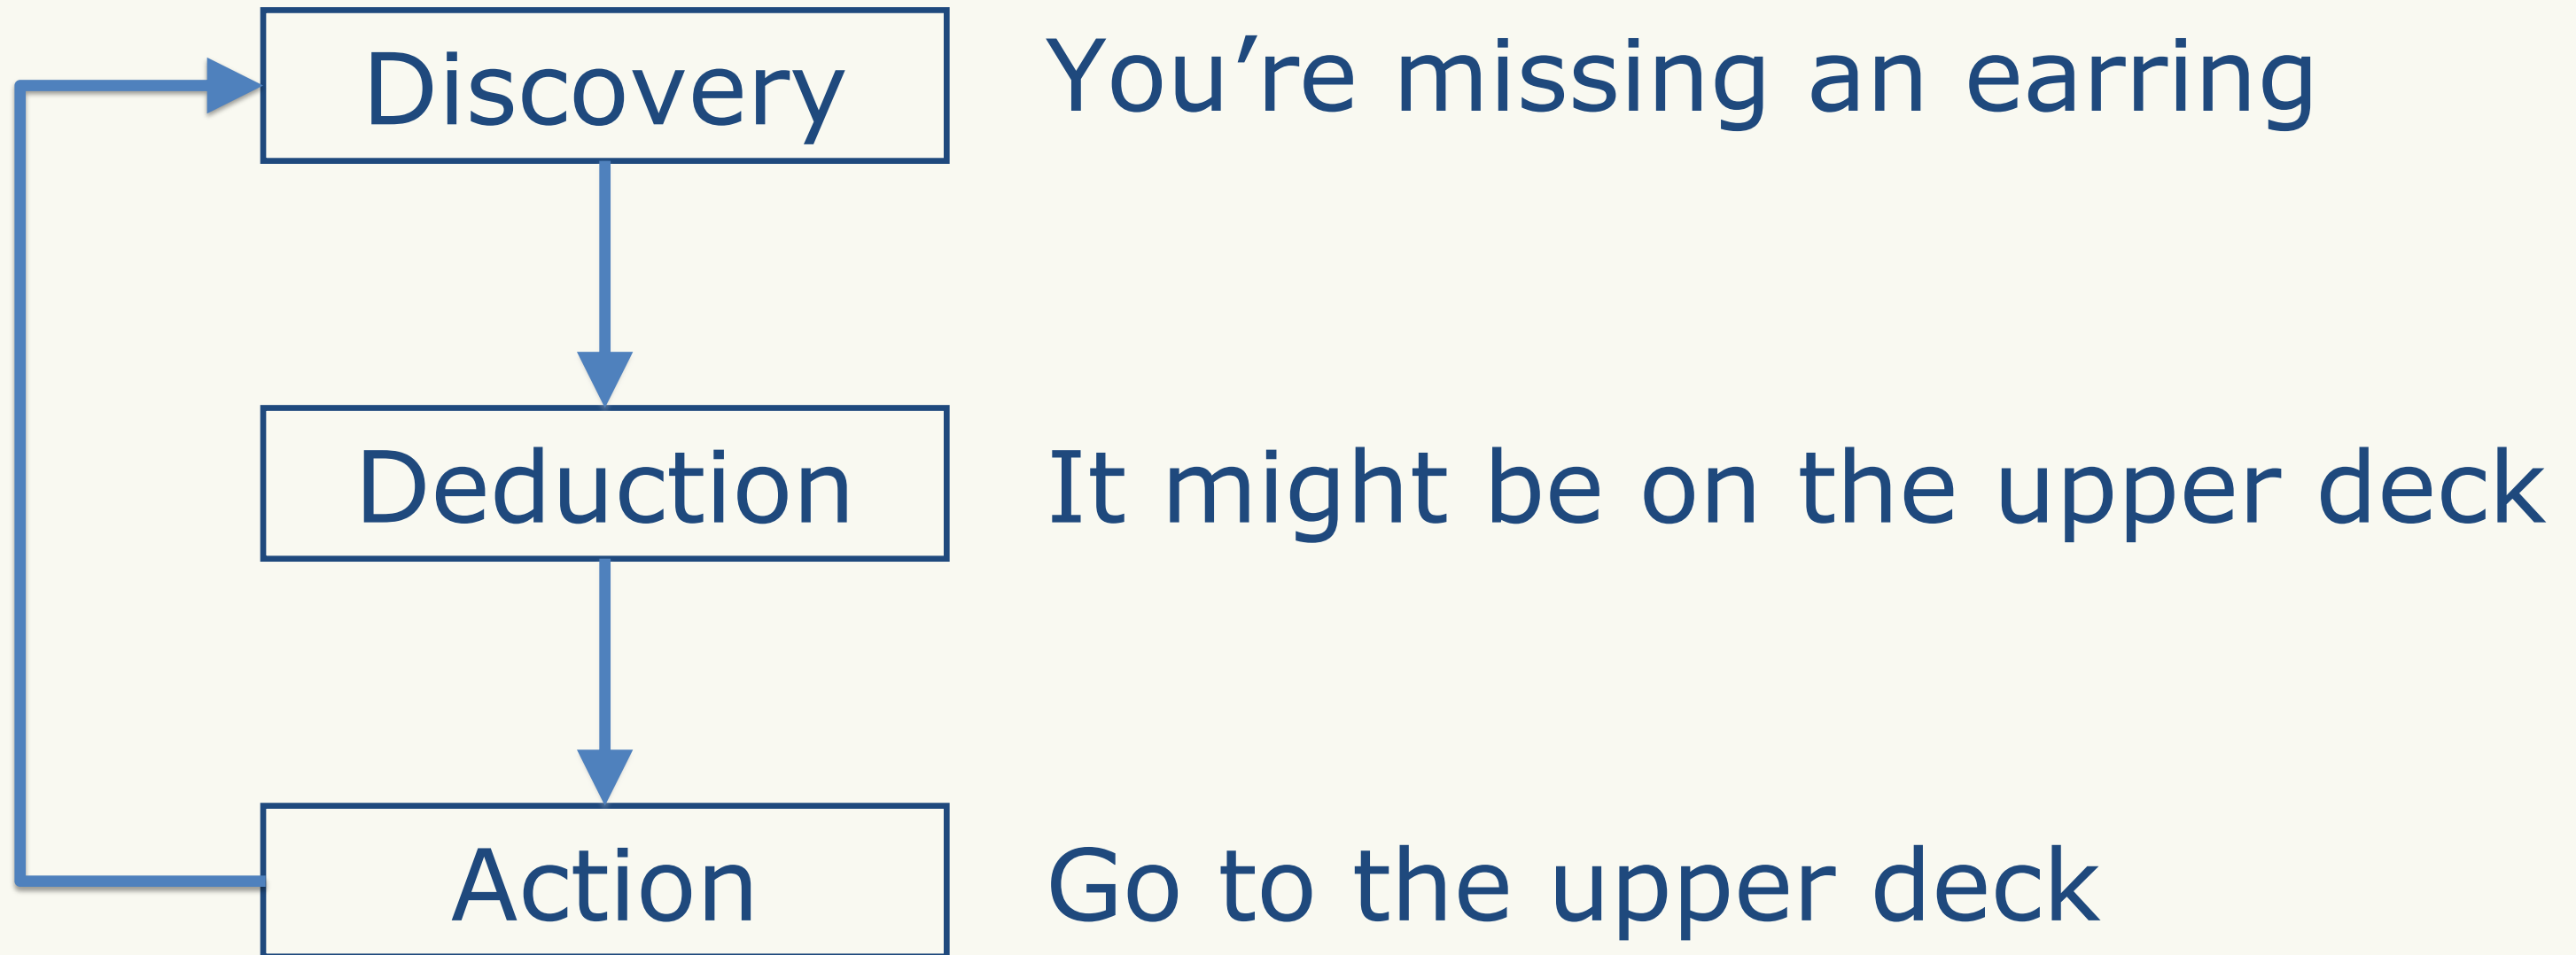

# Detective Games

# The Detective Gameloop

# The Detective Gameloop

# The Detective Gameloop

# The Detective Gameloop

# Expression requires verbs

- Verbs determine what deductions the game can *allow*
- *More expressive verbs => more interesting deductions*

6	8		4		3		5	
4		2		5		3	6	8
5	9	3	6	7	8			4
	1	7	2	8	6	9	4	5
8		9	5		4	2		7
2	5	4	3	9	7	8	1	
7			8	3	1	5	9	2
9	3	5		6		4		1
	2		9		5		7	3

In any meaningful sense this Sudoku is already complete...

... thus all valid Sudokus are already complete...

... thus Sudoku is unnecessary QED

# The Solve

... so you see the monkey was in fact the butler in a mask; and the mysterious bell was the sound of the microwave which had been moved to the upstairs bedroom and hidden behind the grandfather clock...

# Deduction mechanics

- Fact 1 + Fact 2 => exciting new Fact 3!
- Problem 1: You actually have to “have” Fact 1 and Fact 2
- Problem 2: Fact 3 may well be obvious and not exciting
- Problem 3: You also have Facts 4 through Facts 156

# “Where’s the Pair?”

- Britta Teckentrup

- This is a book for toddlers
- It’s unexpectedly difficult!

# “Where’s the Pair?”

- Britta Teckentrup

- This is a book for toddlers
- It’s unexpectedly difficult!
- ... even when the right answer is *the two fish pointing the wrong way*

# Deduction mechanics

More issues!

- **Cluttered:** lots of *stuff* on-screen, but not much *input*!
- **Grows in complexity:** every deduction means *even more facts*
- **Truth is inherently broad:** there's never one path to a fact
- **Hard to write:** where does one fact end and another begin?

# The Big Solve

## Goals:

- Combines facts from the game *and* ideas from the real world
- **Curated input system** so you're not overwhelmed
- **Easy to express ideas**, not too abstract
- **Balanced**: doesn't highlight or hide correct answers
- **Easy to write and embellish**: to encourage multiple paths

# The Big Solve

# The Big Solve

Seriously,  
Watson, don't be  
such a muppet

That was NOT a  
MONKEY it was a  
PYGMY

So I think a  
monkey did it...

Have you read *The  
Sign of Four* though?

Oh god oh god oh  
god stop talking  
stop talking now

# BLOODY VERBS

# BLOODY UI

**unless...?**

"We all saw the unpleasant manner of Madame Shu's death. But none of us heard it. I began to wonder; how could that be?"

"It was no doubt, sadly, rather brief," General Peters said.

"That was exactly my conclusion."

"That is not the important point."

"We all saw the unpleasant manner of Madame Shu's death. But none of us heard it. I began to wonder; how could that be?"

"It was no doubt, sadly, rather brief," General Peters said.

"That is not the important point," I replied.

"The killer covered her mouth," Monsieur Fogg said.

"And," I agreed, "was hence strong."

I shook my head

"We all saw the unpleasant manner of Madame Shu's death. But none of us heard it. I began to wonder; how could that be?"

"It was no doubt, sadly, rather brief," General Peters said.

"That is not the important point," I replied.

"The killer covered her mouth," Monsieur Fogg said.

I shook my head. "It is simpler than that," I declared. "We did not hear her scream because

... she did not scream."

... there was another, louder noise that covered it."

... she was not surprised by the blow."

"We all saw the unpleasant manner of Madame Shu's death. But none of us heard it. I began to wonder; how could that be?"

"It was no doubt, sadly, rather brief," General Peters said.

"That is not the important point," I replied.

"The killer covered her mouth," Monsieur Fogg said.

I shook my head. "It is simpler than that," I declared. "We did not hear her scream because

... there was another, louder noise that covered it."

General Peters sat up sharply.

"The whistling!" he declared. "From the engine!"

The captain turned to him with a frown. "It's true that when the boat rights itself, it makes a squeal. But it's only for a moment. Not enough to cover a scream. Not enough time for someone to be attacked!"

"What if the boat listed further?"

"Unless it was perfectly timed."

Y

SMOKING ROOM

08:35

The facts are these.

Mr Villensey is  
nowhere to be found!

And the last person to see  
him was you, Mrs Villensey!

"You can't prove anything."

"He was with Clarissa last night!"

"Have you checked the bar?"

# Overboard! game phases

Player destroys and fakes evidence to *set up* the accusation

**High agency, low impact**

The accusation scene begins

Player argues and lies to *tilt* the accusation scene

**Low agency, high impact**

An ending is reached

Player

Game

# Accusation scene implementation

- Top-down process (inspired by ink's weave syntax)
- One topic at a time. (A topic is whatever we say it is)
- Important things first, details later
  - Killer blows dealt first  
*e.g. "Someone saw you kill someone else" -> GAME OVER*

# Accusation scene implementation

- A topic / piece of evidence is:
  - introduced
  - discussed by the group, including Veronica
  - concluded with an “accepted outcome”
  - “Outcomes” accumulate against a particular culprit

## TOPIC

“Malcolm is missing”

## DISCUSSION

“Veronica claimed he was with her last night.”

“Steward saw the bed hadn’t been slept in.”

## OUTCOME

“Veronica lied.”

# Accusation scene implementation

- Topics are introduced wherever sensible
  - But each one only discussed once
- Topic discussions teach players what was relevant
- The system isn't rigid
  - An outcome can recontextualize a previous outcome

## TOPIC

“Clarissa and  
Malcolm’s  
affair”

## DISCUSSION

“Veronica knew and  
felt ashamed.”

## OUTCOME

“Veronica’s lie  
was justified.”

# Accusation scene implementation

- Finally, an NPC weighs the outcomes
  - ... and the player can no longer change anything!

# Accusation scene implementation

**Veronica**

3 “guilty outcomes”

**Clarissa**

1 “guilty outcome”

**“Veronica  
is guilty!”**

# Accusation scene implementation

**Veronica**

0 “guilty outcomes”

**Clarissa**

3 “guilty outcome”

**“Clarissa  
is guilty!”**

# Accusation scene implementation

**Veronica**

1 “guilty outcomes”

**Clarissa**

1 “guilty outcome”

**“Probably  
suicide.”**

= no clear culprit

The player is the **detective** but not the **judge**

# Notes

- Feels like quite a natural design?
- Overboard! is replay-to-win
  - But the design doesn't *require* this
- Doesn't have to be dialogue
  - Though dialogue is a natural approach
- The “right path” can be very broad!
  - (We don't know how many ways Overboard! can be won)

Thanks for listening!
